## **DEPARTMENT OF MECHANICAL ENGINEERING**

### **REPORT ON EXPERT LECTURE**

The department of Mechanical engineering of Government Polytechnic Valsad organized an expert lecture for the first semester students on “Industrial-Academic Exposure for diploma students” on 24-07-2023.

The Guest speaker Mr. B. C. Patel, Assistant Professor, Mechanical Engineering Department, Government Engineering College Valsad, was heartily welcomed by Mr. B. N. Patel, Head of the department of Mechanical.

The speaker explained on industry exposure that the main objective of Industrial exposure is to provide an opportunity to the students for learning experiences outside the classroom environment and also to work with industrial professionals.

It is customary to accompany classroom learning with hand-on-practical and often with research internship or industrial projects. Each department is offering industry sponsored project to expose their knowledge towards Real Practical problems. Innovative ideas are put to practice in many projects. Such industrial activity provides students with adequate exposure in tackling real life problems encountered in the working of an industrial entity. The companies also gain from the fresh perspective and inputs of the students as also bettering their profile among the general student community.

As per the feedback received from the participants it was a very good learning experience and the lecture will help the students to understand the Industrial-Academic Exposure.
