GUJARAT TECHNOLOGICAL UNIVERSITY (GTU)

Competency-focused Outcome-based Green Curriculum-2021(COGC-2021) Semester-V

Course Title: Mass Transfer - II
(Course Code: 4350501)

Diploma Programme in which this course is offered	Semester in which offered
Chemical Engineering	5thSemester

1. RATIONALE

Diploma Chemical engineer have to supervise the preliminary purification of raw materials or final separation of products from by-products. They have to deal with changes in composition of solutions known as the mass-transfer operations. The large numbers of towers used for petroleum refining are examples of mass transfer operations. A substantial number of the unit operations of chemical engineering are concerned with the problem of changing the compositions of solutions and mixtures through methods involving chemical reactions. Hence the course has been designed to develop these competencies and its associated cognitive, practical and effective domain learning out comes.

2. COMPETENCY

The course should be taught and curriculum should be implemented with the aim to develop required skills so that students are able to acquire following competency:

- **Perform separation operations for purification of raw materials and products**

3. COURSE OUTCOMES(COs)

The theory, practical experiences and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

CO-1: Operate equipment for various gas liquid contacting operations.
CO-2: Apply concept of distillation to various process industries.
CO-3: Use concept of humidification to various process industries.
CO-4: Apply concept of Absorption in Process Industries
CO-5: Use of Ion exchange and Adsorption in Chemical Industries
CO-6: Apply concept of crystallization in process industries

4. TEACHING AND EXAMINATION SCHEME

Teaching Scheme (In Hours)			Total Credits (L+T+P)	Examination Scheme				
				Theory Marks		Practical Marks		Total Marks
L	T	P	C	CA	ESE	CA	ESE	
3	-	4	5	30*	70	50	50	**200**

(*):Out of 30 marks under the theory CA,10 marks are for assessment of the micro-project to facilitate the integration of COs, and the remaining 20 marks are the average of 2 tests to be taken during the semester for assessing the attainment of the cognitive domain UOs

required for the attainment of the COs.

***Legends: L**-Lecture; **T** – Tutorial/Teacher Guided Theory Practice; **P** - Practical; **C** – Credit, **CA** -Continuous Assessment; **ESE**-End Semester Examination.*

5. SUGGESTED PRACTICAL EXERCISES

The following practical outcomes (PrOs) are the sub-components of the COs. *Some of the **PrOs** marked **'*'** (in approx. Hrs column) are compulsory, as they are crucial for that particular CO at the 'Precision Level' of Dave's Taxonomy related to 'Psychomotor Domain'*.

Sr. No.	**Practical/Exercise** (Course Outcomes in Psychomotor Domain according to NBA Terminology)	Unit No.	Approx. Hrs Required
1	Demonstrate principle, construction and working of equipments for gas–liquid operations with models		4
2	Prepare vapour liquid equilibria curve at atmospheric pressure for Benzene-Xylene		4
3	Carry out simple distillation in glass assembly		4
4	Find out the effect of vacuum on distillation of liquid		4
5	Carry out continuous rectification in packed column		4
6	Find out amount of steam required in steam distillation		4
7	Find out the property of atmospheric air with the help of wet bulb and dry bulb temperature		4
8	Set desired conditions of humid air in humidity control cabin		4
9	Find out rate of absorption in a tray tower		4
10	Find out rate of absorption in a packed tower		4
11	Characterize industrial adsorbents and observe their samples		4
12	Remove colour impurities from water using charcoal		4
13	Find out the yield of crystals from saturated solution without seeding		4
14	Find out the yield of crystals of from saturated solution with seeding		4
Total			**56**

Note

i. More **Practical Exercises** can be designed and offered by the respective course teacher to develop the industry relevant skills/outcomes to match the COs. The above table is only a suggestive list**.**

ii. The following are some **sample** 'Process' and '#Product' related skills (more may be added/deleted depending on the course) that occur in the above listed **Practical Exercises** of this course required which are embedded in the COs and ultimately the competency.

Sr.No.	Sample Performance Indicators for the PrOs	Weight age in %
1	Handling of apparatus for precise measurements	10
2	Record observations correctly	20
3	Practice and adapt good and safe measuring techniques	10
4	Calculations, Interpretation of results and their conclusion.	20

5	Prepare report of practical in prescribed format	10
6	Solve assignment questions.	20
7	Viva-voce	10
Total		**100**

6. MAJOR EQUIPMENT/INSTRUMENTS AND SOFTWARE REQUIRED

These major equipment/instruments and Software required to develop PrOs are given below with broad specifications to facilitate procurement to them by the administrators/management to the institutes. This will ensure the conduction of practice in all institutions across the state in a proper ways other the desired skills are developing in students.

1. Distillation Assembly: 2000 ml round bottom flask, 1000 ml collection flask, joints, adapter with ¾ neck, simple/coiled glass condenser, thermometer pocket
2. Steam distillation setup: Distillation kettle - MOC-MS, dia-150 mm, height 300mm; jacket dia 175 mm height, height 300 mm, pressure gauge, steam relief valve, steam feed line with valve, drain valve, steam trap on jacket outlet, 25 mm glass wool insulation with MS cladding; Condenser – MS shell, tube copper dia-150 mm, height 250; Steam generator inner SS 304, outer MS dia 180 mm, height 270 mm; 25,5litre collecting beaker
3. VLE apparatus: Heating mantle with 1-liter flask, dimmer stat, digital temp indicator, air- and water-cooled condenser, mounted on wooden and MS frame, thermocouples
4. Humidity cabin: Double walled thick gauge chamber SS 304, heater 500 W; Cooling circuit with compressor, expansion valve, condenser and refrigerant; Steam generator SS 304; Control panel with digital temperature indicator, low water level indicator, solenoid valve
5. Batch crystallizer: Jacket 325 mm round, 155 mm deep, 3mm thick, annulus 22.5 mm; 25 mm thick glass wool insulation, Aluminum cladding; motor-stirrer 10mm rod, speed regulator
6. Benzene, Toluene, Xylene, Sand, Limestone, silica gel, Charcoal, boric acid, Sodium sulphate, Potassium permanganate

7. AFFECTIVE DOMAIN OUTCOMES

The following ***sample*** Affective Domain Outcomes (ADOs) are embedded in many of the above-mentioned COs and PrOs. More could be added to fulfill the development of this competency.

a) Work as a leader/a team member.
b) Follow ethical practices
c) Observe safety measures
d) Good house keeping
e) Time management
f) Practice environmentally friendly methods and processes.

The ADOs are best developed through laboratory/field-based exercises. Moreover, the level

of achievement of the ADOs according to Krathwohl's 'Affective Domain Taxonomy' should gradually increase as planned below:

i. 'Valuing Level' in 1st year
ii. 'Organization Level' in 2nd year.
iii. 'Characterization Level' in 3rd year.

8. UNDERPINNING THEORY

The major underpinning theory is given below based on the higher level UOs of *Revised Bloom's taxonomy* that are formulated for development of the COs and competency. If required, more such higher-level UOs could be included by the course teacher to focus on the attainment of COs and competency.

Unit	Major Learning Outcomes (in cognitive domain)	Topics and Sub-topics
Unit I Equipment for Gas Liquid Operations	1a Describe importance of Gas-Liquid operations 1b Classify equipments for Gas Liquid operations 1c Describe construction of equipments with diagram of 1.3 &1.4 1d Explain working principle and operation of equipments with sketches of 1.3 &1.	1.1 Importance of Gas-Liquid operations
		1.2 Classification operations of equipments for Gas-Liquid
		1.3 Gas dispersed, Mechanically Agitated Vessel, Tray tower, Types of trays, Operating problems in tray tower, Real Tray & Tray efficiency- point efficiency, Murphy efficiency, Overall-Tray efficiency (only definition) 1.4 Liquid dispersed, Spray tower, Packed tower and its operating problems
	1e Distinguish different packing with diagram types of	1.5 Types of packing (a) Random (b) Regular
Unit II Distillation	2a Describe applications	2.1 Distillation as a versatile separation method
	2b Describe the steps to Plot VLE, Constant pressure, Constant temperature equilibria	2.2 Vapor Liquid Equilibria, Constant pressure equilibria and Constant temperature equilibria
	2c Explain Relative volatility and laws - Raoult's, Henry's 2c.1State their uses	2.3 Relative volatility 2.4 Raoult's law, Henry's law,and their uses
	2d Differentiate azeotropes	2.5 Maximum and minimum boiling azeotropes
	2e Explain -Flash vaporization, Differential distillation, Continuous rectification 2f Calculate amount and composition for Flash vaporization 2g Calculate product composition for Differential distillation	2.6 Flash vaporization, Material balance and Calculation of amount and composition 2.7 Differential distillation, Derivation of Rayleigh's equation and Calculation of product composition 2.8 Continuous rectification of binary solution, The fractionation operation and Overall material balances
	2h Apply McCabe-Theile method for multistage tray tower for enriching and stripping section 2i Calculate product rates, minimum reflux ratio and number of trays for the given data	2.9 McCabe and Thiele method for enriching and stripping section, Introduction of Feed and Location of the feed tray, Total reflux ratio, Minimum reflux ratio, Optimum reflux ratio, calculations of product rates, minimum reflux

		ratio and number of trays
	2j Compare distillation techniques viz (a) Steam distillation, (b) Vacuum and molecular distillation(c) Azeotropic and extractive distillation	2.10 Important distillation technique Steam distillation, Vacuum and molecular distillation, Azeotropic and extractive distillation
	2k Distinguish Reboilers	2.11 Reboilers and their use
Unit III Humidification	3.a Analyse the VLE for a pure substance	3.1 Vapor-pressure curve 3.2 Saturated and unsaturated vapor-gas mixtures
	3.b Explain the concepts of Absolute humidity, Relative saturation, Percentage saturation, Dew point, Dry bulb temperature, Wet bulb temperature, Adiabatic saturation temperature, Humid volume, Humid heat, Enthalpy	3.3 Concept of Absolute humidity, Relative saturation, Percentage saturation, Dew point, Dry bulb temperature, Wet bulb temperature, Adiabatic saturation temperature, Humid volume, Humid heat, Enthalpy
	3.c Evaluate the property of air using DBT and WBT Calculate – absolute humidity, relative saturation, percentage saturation for the given process data	3.4 Calculations of absolute humidity, relative saturation, percentage saturation
	3.d Draw psychometric chart List Purposes of contact of gas with pure Liquid	3.5 Psychometric charts for Air-Water system 3.6 Purposes of contact of gas with pure Liquid
	3.e Explain construction and working with diagram	3.7 Equipments, Cooling towers.
Unit IV Gas Absorption	4.a Apply concept of absorption	4.1 Industrial application of Absorption Gas Absorption
	4.b Describe the physical properties of gases 4.c Explain Raoult's law	4.2 Equilibrium solubility of gases in liquids and effect of temperature and pressure. 4.3 Ideal solution and Raoult's law
	4.d Select appropriate solvent	4.4 Solvent for absorption
	4.e Explain Material balance in different condition 4.f Select liquid-gas ratio for absorber	4.5 Material balance for one component transfer 1. Counter current flow 2. Co-current flow 3. counter current multistage operation 4.6 Minimum liquid-gas ratio for absorber
	4.g Explain tray tower and packed tower 4.h Evaluate various packing	4.7 HETP

	4.i Calculate absorption based on material balance	4.8 Raoult's law and material balance applied in gas absorption
Unit V Adsorption and Ion Exchange	5.a Define and state uses of Adsorption	5.1 Definition and industrial application of Adsorption
	5.b Classify Adsorption and adsorbents 5.c State Commonly used adsorbents	5.2 Types of adsorptions, Nature of adsorbents, commonly used adsorbents
	5.d Analyse Adsorption Equilibria 5.e Describe Effect of temperature on adsorption and Heat of adsorption	5.3 Adsorption Equilibria, Adsorption hysteresis, Effect of temperature on adsorption and Heat of adsorption
	5.f Apply Freudlich's equation for single stage and multi stage cross-current operation 5.g Describe adsorption from dilute and concentrated solution	5.4 Adsorption from liquids, Adsorption from dilute solution, The Freundlich's equation, Adsorption from concentrated solutions, Material balance and Freundlich's equation for single stage operation.
	5.h Describe construction and working of Higgins contactor, Pressure swing adsorber	5.5 Higgins contactor and Pressure swing adsorber
	5.i Appreciate concepts of Ion Exchange 5.j List Application of Ion Exchange	5.6 Ion-Exchange: Principles, Application.
Unit VI Crystallization	6.a State Industrial applications of crystallization	6.1 Industrial applications of crystallization
	6.b Explain equilibria mechanism for crystallization 6.c State the methods to get Super saturation	6.2 Equilibria and yields, Super saturation and methods to get it, Nucleation and Crystal growth
	6.d Explain working principle and operation of Crystallization Equipment with sketch 6.e Describe construction of Crystallization Equipment	6.3 Crystallization Equipment, Vacuum crystallizer, Swenson walker crystallizer.
	6.f State and explain Meir's theory	6.4 Meir's theory
	6.g Calculate the crystal yield	6.5 Crystallization with and without seeding 6.6 Calculations of crystal yield
	6.h List steps to Prevent caking of crystals	6.7 Caking of crystals and its prevention

9. SUGGESTED SPECIFICATION TABLE FOR QUESTION PAPER DESIGN

Unit	Unit Title		Distribution of Theory Marks

		Teaching Hours	R Level	U Level	A Level	Total Marks
I	EquipmentforGas LiquidOperations	04	2	03	02	7
II	Distillation	12	05	06	08	19
III	Humidification	06	02	04	03	09
IV	Gas Absorption	07	02	04	08	14
V	Adsorption&Ion-Exchange	08	04	04	04	12
VI	Crystallization	05	03	03	03	09
Total		**42**	**18**	**24**	**28**	**70**

Legends: *R=Remember, U=Understand, A=Apply and above (Revised Bloom's taxonomy)*

Note*: This specification table provides general guidelines to assist students for their learning and to teachers to teach and question paper designers/setters to formulate test items/questions to assess the attainment of the UOs. The actual distribution of marks at different taxonomy levels (of R, U and A) in the question paper may slightly vary from above table.*

10. SUGGESTED STUDENT ACTIVITIES

Other than the classroom and laboratory learning, following are the suggested student-related ***co-curricular*** activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should perform following activities in group and prepare reports of about 5 pages for each activity. They should also collect/record physical evidences for their (student's) portfolio which may be useful for their placement interviews:

Following is the list of proposed student activities like:

1. Assignments
2. Technical Quiz/MCQ Test
3. Presentation on some course topic
4. I-net based assignments
5. Undertake micro-Project in team/individually

11. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:

a) Massive open online courses (*MOOCs*) may be used to teach various topics/subtopics.
b) Guide student(s) in undertaking micro-projects/activities.
c) Different types of teaching methods i.e. video demonstration, activity based learning, case study, m-learning need to be employed by teachers to develop the outcomes.
d) Some *of the topics/sub-topics* which is relatively simpler or descriptive is to be given to the students for *self-learning* but to be assessed using different assessment methods.
e) Teachers need to ensure to create opportunities and provisions for *co-curricular activities*.
f) Guide students to address issues on environment and sustainability with reference to using the knowledge of this course

g) OERs, Vlab, and Olabs may be used to teach for the teaching of different concepts.

12. SUGGESTED MICRO-PROJECTS

Only one micro-project is planned to be undertaken by a student that needs to be assigned to him/her at the beginning of the semester. In the first four semesters, the micro-project is group-based (group of 3 to 5). However, **in the fifth and sixth semesters**, the number of students in the group should ***not exceed three.***

The micro-project could be industry application-based, internet-based, workshop-based, laboratory-based, or field-based. Each micro-project should encompass two or more COs which are the integration of PrOs, UOs, and ADOs. Each student will have to maintain dated work diary consist in go find individual contributions in the project work and give a seminar presentation of it before submission. The duration of the micro project should be about **14-16** ***(fourteen to sixteen) student engagement hours*** during the course. The students ought to submit micro-project by the end of the semester (so that they develop industry-oriented COs).

A suggestive list of micro-projects is given here. This should relate highly to the competency of the course and the COs. Similar micro-projects could be added by the concerned course teacher.

1.	Prepare chart/model of Mass transfer operation and applications.
2.	Prepare 15-20 slides power point presentation onmass transfer operation along with their examples.
3.	Prepare 15-20 slides power point presentation on topic of mass transfer operation.
4.	Prepare Laboratory set up for distillation, absorption, crystallization, humidification, Gas liquid operation or ion exchange.
5.	Prepare a demonstrative model of any mass transfer equipment.
6.	Prepare Working model of any mass transfer equipment.

13. SUGGESTED LEARNING RESOURCES

Sr. No.	Title of Books	Author	Publication with place, year and ISBN
1	Mass Transfer Operations	Robert E.Treybal	Mc Graw- Hill, 3rd Edition,1981
2	Unit Operation of Chemical Engineering	McCabe, Warren	McGraw Hill Publication, NewYork2004, 7th Edition
3	Unit Operations-II	K.A. Gavhane	Nirali Prakashan, Pune
4	Unit Operations of Chemical Engineering,Volume-I	P. Chattopadhyay	Khanna Publishers, NewDelhi,1995
5	Chemical Engineering,Volume-2	Coulsion and Richardson	Butterworth-Heinemann; 5thEdition, 2002
7	Introduction to Chemical Engineering	L.Badger, Julius T.Banchero	McGraw Hill Publication, NewYork, 7thEdition, 2004

14. SUGGESTED LEARNING WEBSITES

a. www.unitoperation.com
b. http://nptel.ac.in/courses/index.php?subjectId=103103035
c. http://1rv07ch.files.wordpress.com/2010/05/lecture1-introduction2mass-transfer.pdf
d. http://www.msubbu.in/ln/mt/

GUJARAT TECHNOLOGICAL UNIVERSITY (GTU)

Competency-focused Outcome-based Green Curriculum-2021(COGC-2021)
Semester-V

Course Title: Waste to Energy Conversion Technology
(Course Code: 4350502)

Diploma Programme in which this course is offered	Semester in which offered
Chemical Engineering	5th Semester

1. RATIONALE

The objective of the course is to provide insights into waste management options by reducing the waste destined for disposal and encouraging the use of waste as a resource for alternate energy production. This course is designed to provide an understanding of the various aspects of Waste to Energy. The various sources of waste generation are analyzed with a focus on its potential for energy production. The need for characterization of wastes will be discussed along with the existing norms for waste utilization for alternate energy source. Various Technological options available for the production of energy form waste.

2. COMPETENCY

The course should be taught and curriculum should be implemented with the aim to develop required skills so that students are able to acquire following competency:

- **To Supervise operation and to Optimize energy and Other Inventories**

3. COURSE OUTCOMES(COs)

The theory, practical experiences and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

a) Identify different wastes as a energy source
b) Apply concept of Thermo-chemical process for energy conversion
c) Apply concept of Biochemical process for energy conversion
d) Utilize algal biomass as source of energy production

4. TEACHING AND EXAMINATION SCHEME

Teaching Scheme (In Hours)			Total Credits (L+T+P)	Examination Scheme				
				Theory Marks		Practical Marks		Total Marks
L	T	P	C	CA	ESE	CA	ESE	
3	-	-	3	30*	70	-	-	**100**

(*):Out of 30 marks under the theory CA,10 marks are for assessment of the micro-project to facilitate the integration of COs, and the remaining 20 marks are the average of 2 tests to be taken during the semester for assessing the attainment of the cognitive domain UOs required for the attainment of the COs.

Legends: ***L****-Lecture;* ***T*** *– Tutorial/Teacher Guided Theory Practice;* ***P*** *- Practical;* ***C*** *– Credit,* ***CA*** *-Continuous Assessment;* ***ESE****-End Semester Examination.*

5. SUGGESTED PRACTICAL EXERCISES

The following practical outcomes (PrOs) are the sub-components of the COs. *Some of the* ***PrOs*** *marked* ***'*'*** *(in approx. Hrs column) are compulsory, as they are crucial for that particular CO at the 'Precision Level' of Dave's Taxonomy related to 'Psychomotor Domain'*.

Sr. No.	Practical/Exercise (Course Outcomes in Psychomotor Domain according to NBA Terminology)	Unit No.	Approx. Hrs Required
Not Applicable			

Note

i. More **Practical Exercises** can be designed and offered by the respective course teacher to develop the industry relevant skills/outcomes to match the COs. The above table is only a suggestive list**.**

ii. The following are some **sample** 'Process' and '#Product' related skills (more may be added/deleted depending on the course) that occur in the above listed **Practical Exercises** of this course required which are embedded in the COs and ultimately the competency.

Sr. No.	Sample Performance Indicators for the PrOs	Weight age in %
1	Question answer or Writing steps exercise (Assignment)	30
2	Executing of exercise	30
3	Result	40
Total		**100**

6. MAJOR EQUIPMENT/INSTRUMENTS AND SOFTWARE REQUIRED

These major equipment/instruments and Software required to develop PrOs are given below with broad specifications to facilitate procurement to them by the administrators/management to the institutes. This will ensure the conduction of practice in all institutions across the state in a proper ways other the desired skills are developing in students.

Sr. No.	Equipment Name with Broad Specifications	PrO. No.
Not Applicable		

7. AFFECTIVE DOMAIN OUTCOMES

The following ***sample*** Affective Domain Outcomes (ADOs) are embedded in many of the above-mentioned COs and PrOs. More could be added to fulfill the development of this competency.

a) Work as a leader/a team member.
b) Follow ethical practices
c) Observe safety measures

d) Good house keeping
e) Time management
f) Practice environmentally friendly methods and processes.

The ADOs are best developed through laboratory/field-based exercises. Moreover, the level of achievement of the ADOs according to Krathwohl's 'Affective Domain Taxonomy' should gradually increase as planned below:

i. 'Valuing Level' in 1st year
ii. 'Organization Level' in 2nd year.
iii. 'Characterization Level' in 3rd year.

8. UNDERPINNING THEORY

The major underpinning theory is given below based on the higher level UOs of *Revised Bloom's taxonomy* that are formulated for development of the COs and competency. If required, more such higher-level UOs could be included by the course teacher to focus on the attainment of COs and competency.

Unit	Major Learning Outcomes(Course Outcomes in Cognitive Domain according to NBA terminology)	Topics and Sub-topics
Unit:1 Characterization of waste	1a. Classification of waste as energy	1.1 Definition of wastes and their classification 1.2 Important quality parameters of different types of wastes 1.3 Wastes suitable for energy production
	1c. Characterization of wastes	1.4 Characterization of solid wastes and waste water
	1d. Explain Technologies for Waste to Energy Conversion	1.5 Energy from wastes, some scenario 1.6 Routes for energy production from wastes 1.7 Define Biochemical Conversion and Thermo-chemical Conversion
	1b. Explain Status of wastes	1.8 Status of waste to Energy conversion in India.
	1d. Solve simple numerical	1.9 Numerical based on Characterization of wastes
Unit:2 Thermo-chemical Conversion	2a. Explain Mechanism of combustion	2.1 Definition and scope of combustion/incineration 2.2 Environmental and health impacts of incineration 2.3 Advantages and Disadvantages of combustion 2.4 Air requirement for combustion
	2b. Classification of combustors	2.5 Type of combustor 2.6 Energy production from wastes through incineration
	2c. Explain Basic chemistry of gasification	2.7 Concept and Advantages of gasification
	2d. Classification of Gasifier	2.8 Types of Gasifier 2.9 Energy production through gasification of wastes
	2e. Comparison Combustion and gasification	2.10 Comparison between incineration and gasification

` GTU - COGC-2021 Curriculum

	2f. Classification of pyrolysis	2.11 Definition and mechanism of pyrolysis 2.12 Types of pyrolysis 2.13 Operating conditions and end product distribution
	2g Explain Properties of Pyrolysis products	2.14 Use of pyrolysis products 2.15 Properties of bio oil and need of its upgradation 2.16 Utilization of pyro char and gases
	2h. Solve simple numerical	2.17 Numerical based on combustion, gasification and Pyrolysis
Unit:3 Biochemical Conversion	3a. Outline Properties of biogas	3.1 Properties of biogas (Calorific value and composition) 3.2 Factors affecting biogas yield
	3b. Explain and Classify Anaerobic digestion	3.3 Feedstock's and primary products of Anaerobic digestion 3.3 Mechanism of anaerobic digestion 3.5 Flow sheet for anaerobic digestion of wastes 3.6 Types of anaerobic digesters and their operation
	3c. Energy production from wastes through fermentation	3.7 Different energy sources from biomass / wastes through fermentation 3.8 Production of ethanol from starchy crops (corn), lingo cellulosic biomass (LCB) and through gasification route 3.9 Butanol production from LCB
	3d. Energy production from wastes through transesterification	3.10 Transesterification process and Organic wastes for transesterification 3.11 Production of bio oil from oil seeds and its major composition 3.12 Up gradation of bio oil to bio diesel
	3e. Solve simple numerical	3.13 Numerical based on biochemical conversion process
Unit:4 Cultivation of algal Biomass	4a. Explain algal cultivation	4.1 Why algal cultivation? 4.2 Algal metabolism and synthesis of fat and protein
	4b. Classify algae	4.3 Classification of microalgae phyla 4.4 Lipid content in algal cell
	4c Show growth of microalgae	4.5 Reactor systems for cultivation/ growth of microalgae
	4b. Energy production from algal Biomass	4.6 Important energy production routes for algal biomass 4.7 Conversion of algal oil to biodiesel 4.8 Types of conversion process, mechanisms and comparison 4.9 Factors affecting biodiesel yield

		4.10 Upgradation of algal oil to bio diesel using homogenous and heterogeneous catalysts

9. SUGGESTED SPECIFICATION TABLE FOR QUESTION PAPER DESIGN

Unit	Unit Title	Teaching Hours	Distribution of Theory Marks			
			R Level	U Level	A Level	Total Marks
I	Characterization of waste	6	2	4	2	8
II	Thermo-chemical Conversion	14	5	10	10	25
III	Biochemical Conversion	14	5	10	10	25
IV	Cultivation of algal	8	6	6	0	12
	Total	**42**	**18**	**30**	**22**	**70**

Legends: *R=Remember, U=Understand, A=Apply and above (Revised Bloom's taxonomy)*

Note*: This specification table provides general guidelines to assist students for their learning and to teachers to teach and question paper designers/setters to formulate test items/questions to assess the attainment of the UOs. The actual distribution of marks at different taxonomy levels (of R, U and A) in the question paper may slightly vary from above table.*

10. SUGGESTED STUDENT ACTIVITIES

Other than the classroom and laboratory learning, following are the suggested student-related ***co-curricular*** activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should perform following activities in group and prepare reports of about 5 pages for each activity. They should also collect/record physical evidences for their (student's) portfolio which may be useful for their placement interviews:

Following is the list of proposed student activities like:

1. Assignments
2. Technical Quiz/MCQ Test
3. Presentation on some course topic
4. I-net based assignments
5. Undertake micro-Project in team/individually

11. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:

a) Massive open online courses (*MOOCs*) may be used to teach various topics/subtopics.
b) Guide student(s) in undertaking micro-projects/activities.
c) Different types of teaching methods i.e. video demonstration, activity based learning, case study, m-learning need to be employed by teachers to develop the outcomes.
d) Some *of the topics/sub-topics* which is relatively simpler or descriptive is to be given to the students for *self-learning* but to be assessed using different assessment methods.
e) Teachers need to ensure to create opportunities and provisions for *co-curricular activities*.

f) Guide students to address issues on environment and sustainability with reference to using the knowledge of this course
g) OERs, Vlab, and Olabs may be used to teach for the teaching of different concepts.

12. SUGGESTED MICRO-PROJECTS

Only one micro-project is planned to be undertaken by a student that needs to be assigned to him/her at the beginning of the semester. In the first four semesters, the micro-project is group-based (group of 3 to 5). However, **in the fifth and sixth semesters**, the number of students in the group should ***not exceed three.***

The micro-project could be industry application-based, internet-based, workshop-based, laboratory-based, or field-based. Each micro-project should encompass two or more COs which are the integration of PrOs, UOs, and ADOs. Each student will have to maintain dated work diary consist in go find individual contributions in the project work and give a seminar presentation of it before submission. The duration of the micro project should be about **14-16** ***(fourteen to sixteen) student engagement hours*** during the course. The students ought to submit micro-project by the end of the semester (so that they develop industry-oriented COs).

A suggestive list of micro-projects is given here. This should relate highly to the competency of the course and the COs. Similar micro-projects could be added by the concerned course teacher.

1	Prepare chart/model of Classification of waste along with their Mechanism and applications
2	Prepare chart of Status of waste to Energy conversion in India
3	Prepare chart/model types of Combustor
4	Draw suitable chart for various Combustor equipment
5	Prepare 15-20 slides power point presentation showing Classification of waste along with their examples
6	Prepare 15-20 slides power point presentation Characterization of wastes
7	Prepare 15-20 slides power point presentation on Waste to energy technology
8	Prepare a demonstrative model of any Gasifier reactor
9	Prepare a demonstrative model of any waste to energy conversion technology equipment
10	Prepare Working model of any waste to energy conversion technology equipment
11	Prepare 15-20 slides power point presentation on energy crisis in India and its solution
12	Prepare a model on pyrolysis system that can convert plastic into gas or oil.
13	Prepare chart/model of Incineration.
14	Prepare 15-20 slides power point presentation on comparison of seven different countries best practices for waste energy recovery with India.

13. SUGGESTED LEARNING RESOURCES

Sr. No.	Title of Books	Author	Publication with place, year and ISBN
1	Waste-to-Energy: Technologies and Project Implementation	Marc J Rogoff Dr and Francois Screve	William Andrew; 2nd edition (15 June 2011)

2	Biogas Technology	Khandelwal K. C. and Mahdi S. S	Vol. I & II Tata McGraw Hill Publishing Co. Ltd., 1983
3	Solid Waste Engineering	Vesilind P.A. and Worrell W. A	2nd Ed. Cengage India (2016)
4	Thermo-chemical Processing of Biomass: Conversion into Fuels, Chemicals and Power	Robert C. Brown,	John Wiley and Sons, USA (2019)
5	Municipal Solid Waste to Energy Conversion processes	Young G.C	John Wiley and Sons

GUJARAT TECHNOLOGICAL UNIVERSITY (GTU)

Competency-focused Outcome-based Green Curriculum-2023(COGC-2021)
Semester-V

Course Title: Chemical Engineering Project -I
(Course Code: 4350503)

Diploma Programme in which this course is offered	Semester in which offered
Chemical Engineering	5thSemester

1. RATIONALE

Project work serves as a means for students to utilize their coursework knowledge and skills to solve particular problems or execute projects, ultimately fostering innovative skills. In addition, Developing a plant for a chemical product is a complex task that requires a comprehensive report encompassing various aspects such as the chemical process and unit operations, properties of raw materials and products, economic factors, safety and pollution issues, and material and energy consumption. Chemical engineering students need to prepare such reports to become successful entrepreneurs while keeping in mind sustainability factors. A wide range of sustainable chemical products can be chosen from different sectors, including petrochemicals, fertilizers, pharmaceuticals, pesticides, natural products, polymers, and dyes. Careful consideration must be given to major equipment specifications, plant layout, and location to ensure the sustainability and success of the project.The syllabus provided is a guide, and instructors have the option to motivate students to develop prototypes, conduct experiments, or generate novel ideas that spark innovation.

2. COMPETENCY

The course should be taught and curriculum should be implemented with the aim to develop required skills so that students are able to acquire following competency:

- **Identifying a chemical product, evaluating its essential features and characteristics, understanding the manufacturing processes involved, and selecting appropriate Process, equipment and instruments for the production.**

3. COURSEOUTCOMES(COs)

The theory, practical experiences and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

a) Select a chemical product based on market demand, raw material availability, and potential profitability.
b) Analyze the market and historical trends of a chemical product and explain its essential features and characteristics.
c) Evaluate the properties and applications of chemical products in different contexts.
d) Identify critical steps involved in production process.
e) Select major equipments and instruments for chemical manufacturing processes.

4. TEACHINGANDEXAMINATIONSCHEME

Teaching Scheme(InHours)			Total Credits(L+T+P)	ExaminationScheme				
				Theory Marks		Practical Marks		Total Marks
L	T	P	C	CA	ESE	CA	ESE	
0	0	4	2	0	0	50	50	100

***Legends: L**-Lecture; **T** – Tutorial/Teacher Guided Theory Practice; **P** - Practical; **C** – Credit, **CA** -Continuous Assessment; **ESE**-End Semester Examination.*

5. SUGGESTED PRACTICAL EXERCISES

The following practical outcomes (PrOs) are the sub-components of the COs. *Some of the **PrOs** marked **'*'** (in approx. Hrs column) are compulsory, as they are crucial for that particular CO at the 'Precision Level' of Dave's Taxonomy related to 'Psychomotor Domain'*.

Sr. No.	**Practical/Exercise** (Course Outcomes in Psychomotor Domain according to NBA Terminology)	Unit No.	Approx. Hrs Required
1	selecting one chemical product based on specific criteria such as demand, availability of raw materials, and potential profitability	1	8
2	Evaluate the historical development of the selected chemical product, including major breakthroughs, challenges	2	4
3	Compare the chemical and physical properties of the selected chemical product with other similar products in the market	3	4
4	Identify the various applications of the selected chemical product in different industrial and commercial contexts	3	8
5	Analyze the advantages and disadvantages of each manufacturing process for the selected chemical product to determine the most suitable sustainable process.	4	12
6	Create a flow diagram of the manufacturing process for the selected chemical product, including inputs and outputs at each step.	4	8
7	select and use appropriate equipment and instruments for the selected chemical process	5	12
		Total	**56**

Note

i. More **Practical Exercises** can be designed and offered by the respective course teacher to develop the industry relevant skills/outcomes to match the COs. The above table is only a suggestive list**.**

ii. The following are some **sample** 'Process' and '#Product' related skills (more may be added/deleted depending on the course) that occur in the above listed **Practical Exercises** of this course required which are embedded in the COs and ultimately the competency.

Sr.No.	Sample Performance Indicators for the PrOs (The instructor is permitted to make slight modifications as deemed necessary).	Weightage in %

1	Clarity and organization of the report	20
2	Demonstration of technical knowledge	25
3	Significance of problem/solution/conceptual feasibility analysis	15
4	Rigor and appropriateness of the methodology	15
5	Accuracy and relevance of the results	15
6	Analysis and interpretation of the results	05
7	Overall contribution to the field	05
	Total	**100**

6. MAJOREQUIPMENT/INSTRUMENTSANDSOFTWAREREQUIRED: N/A

7. AFFECTIVE DOMAIN OUTCOMES

The following ***sample*** Affective Domain Outcomes (ADOs) are embedded in many of theabove-mentioned COs and PrOs. More could be added to fulfill the development of thiscompetency.

a) Work as a leader/a team member.
b) Follow ethical practices
c) Observe safety measures
d) Good house keeping
e) Time management
f) Practice environmentally friendly methods and processes.

The ADOs are best developed through laboratory/field-based exercises. Moreover, the level of achievement of the ADOs according to Krathwohl's 'Affective Domain Taxonomy' should gradually increase as planned below:

i. 'Valuing Level' in 1st year
ii. 'Organization Level' in 2nd year.
iii. 'Characterization Level' in 3rd year.

8. COURSE DETAILS

Unit	Major Learning Outcomes(Course Outcomes in Cognitive Domain according to NBA terminology)	Topics and Sub-topics
Unit-I **Chemical Product Selection and Market Analysis**	1.1 Identify a chemical product by conducting a market survey	1. Choose a chemical product from a range of chemical sectors, including but not limited to petrochemicals, fertilizers, pharmaceuticals, pesticides, natural products, polymers, acids and alkalis, specialty chemicals, dyes, and pigments.
	1.2 selecting one based on specific criteria such as demand, availability of raw materials, and potential profitability.	

Unit-II **Product survey and Industry Analysis**	2.1 Explain the essential features and characteristics of the selected chemical product.	2.1 Introduction of the selected chemical product, including its essential features and applications
	2.2 Examine the current trends in the market and industrial landscape of the selected chemical product.	2.2 Historical development of the selected chemical product, including major milestones and breakthroughs.
	2.3 Evaluate the historical development of the selected chemical product, including major breakthroughs, challenges.	2.3 The current state of the selected chemical product, including market trends and major industries involved in its production.
Unit-III **Characteristics and Application of chemicals involved in process**	3.1 Discuss the chemical and physical properties of the raw materials used in the production of the selected chemical product, and their impact on the final product.	3.1 The properties of raw materials used in the production of the chemical product.
		3.2 chemical and physical properties of the final product
	3.2 Compare the chemical and physical properties of the selected chemical product with other similar products in the market (if any).	3.3 Application of final product in different industrial and commercial contexts (Instructors are requested to stimulate students to think creatively and unconventionally).
	3.3 Identify the various applications of the selected chemical product in different industrial and commercial contexts.	
Unit-IV **Process Analysis for Sustainable Manufacturing**	4.1 Understand the different manufacturing processes involved in producing a chemical product and their respective steps, inputs, and outputs.	4.1 Different manufacturing processes with flow diagram involved in producing the chemical product and their respective steps, inputs, and outputs.
	4.2 Analyze the advantages and disadvantages of each manufacturing process for the selected chemical product to determine the most suitable sustainable process.	4.2 Merits, demerits, and engineering challengesof each manufacturing process for the selected product.
		4.3 Various critical steps in the production process.
	4.3 identify the critical steps in the production process.	4.4 waste generation/environmental impact of each process.
	4.4 Create a flow diagram of the manufacturing process for the selected chemical product, including inputs and outputs at each step.	

Unit-V **Selection of Major Process Equipments and Instrumentation**	5.1 Identification of the necessary equipment and instruments for the selected chemical process	5.1 Description of the necessary equipment and instruments for the selected chemical process.
	5.2 Understanding the functions and roles of each equipment and instrument in the manufacturing process	5.2 Advantages and disadvantages of selected instruments.
		5.3 The functions and roles of each equipment and instrument in the manufacturing process.
	5.3 select and use appropriate equipment and instruments for the selected chemical process	5.4 Selection criteria for instrument

9. SUGGESTEDSPECIFICATIONTABLEFORQUESTIONPAPERDESIGN:N/A

Legends: *R=Remember, U=Understand, A=Apply and above (Revised Bloom's taxonomy)*

Note*: This specification table provides general guidelines to assist students for their learningand to teachers to teach and question paper designers/setters to formulate test items/questionsto assess the attainment of the UOs. The actual distribution of marks at different taxonomylevels(of R, Uand A) in thequestion paper mayslightlyvaryfromabovetable.*

10. SUGGESTEDSTUDENTACTIVITIES

Following are the suggested student-related activities which can be undertaken to accelerate the attainment of the various outcomes in this course:

1. Industrial visit
2. Laboratories experiment
3. Literature Study
4. Attend Workshops
5. Internships
6. Take Part in Competitions
7. Course/topic based presentation

11. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:

a) Faculty can act as mentors to their students, providing guidance and support as they work on their final year projects.
b) Faculty can facilitate group work, encourage peer feedback and provide

opportunities for students to work together on projects.

c) Faculty can provide opportunities for students to work with laboratory equipment and conduct experiments, for example.
d) Guide students to address issues on environment and sustainability with reference to using the knowledge of this course.
e) Provide regular feedback and assessment on student work.
f) Faculty can provide resources and support for students to pursue their own interests and areas of study.
g) Faculty can provide opportunities for students to share their work with their peers and receive feedback.
h) Faculty can incorporate active learning strategies, such as group discussions and problem-solving activities, into their final year project instruction.

12. SUGGESTEDMICRO-PROJECTS: N/A

GUJARAT TECHNOLOGICAL UNIVERSITY (GTU)

Competency-focused Outcome-based Green Curriculum-2021(COGC-2021)

Semester-V

Course Title: Summer Internship-II

(Course Code: 4350504)

Diploma Programme in which this course is offered	Semester in which offered
Chemical Engineering	5thSemester

1. RATIONALE

Chemical Process Industries covert raw materials in to useful products using various processes and operations. The role of chemical engineer is to operate and handle various processes, operations and equipment effectively and ensuring safe work conditions and compliance health and safety regulation. Internship is educational and career development opportunities, providing practical experience in a field of chemical engineering. It will expose Technical students to the industrial environment, which cannot be simulated in the classroom and hence creating competent professionals for the industry. It may help students to acquaint themselves with the field they are interested in. Summer Internship-II offer students the chance to put what they are learning into action, in a real-world environment. It may help student to strengthen existing soft skills that are beneficial to career, in addition to scientific and technical skills like accountability, interpersonal skills, organization skills, problem-solving skills, teamwork, creative thinking and time management skills etc. Summer Internship-II is a great way to gain hands-on experience real-life engineering workplace and supplement their engineering education. This allows students to apply academic coursework, and to gain insight into the professional life of an engineer. It will help to optimize manufacturing process thereby achieving production target with an economical cost.

2. COMPETENCY

The course should be taught and curriculum should be implemented with the aim to develop required skills so that students are able to acquire following competency:

- Operate various unit operations and processes by using standard operating procedure in the chemical process industry.
- Get hands-on training, technical experience and opportunities to learn, understand and sharpen the technical / managerial skills in a real-world environment.

3. COURSE OUTCOMES(COs)

The practical experiences and relevant soft skills associated with this course are to be implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

1. Apply basic chemical engineering knowledge to understand working of various unit operations and processes in the chemical process industry.
2. Make use of standard operating procedures for various unit operations and processes in the chemical process industry.

3. Identify engineering problems and troubleshooting in the chemical process industry.
4. Identify the various safety measures and pollution control techniques used in the chemical process industry.
5. Develop lifelong learning in team management, communication skills and supplement technical knowledge.

4. TEACHING AND EXAMINATION SCHEME

Teaching Scheme(In Hours)			Total Credits(L+T+P)	Examination Scheme				
				Theory Marks		Practical Marks		Total Marks
L	T	P	C	CA	ESE	CA	ESE	
0	0	0	3	00	00	50	50	100

***Legends: L**-Lecture; **T** – Tutorial/Teacher Guided Theory Practice; **P** - Practical; **C** – Credit, **CA** -Continuous Assessment; **ESE**-End Semester Examination.*

5. MODE OF INTERNSHIP

- **Internship in the industry**

Internship in the industries/organization is to be arranged for the students of 5th semester based on internship guideline.

- **Project based internship**

Suitable topic related to Chemical Engineering like project based on industrial problem, working model of the equipment, Lab experiment and data analysis, and Design and analysis of the system/equipment, etc can be given as a mini project to the students of 5th semester.

6. INTERNSHIP GUIDELINES:

The summer internship-II for students in industries/organization is to be arranged in the beginning of 5th semester/ as per schedule given by GTU.

- Time Duration: 6 Weeks
- Training area: Large/Medium/Small Scale Chemical Process/ Allied industries

The general suggestive procedure for arranging internship is given below:

Step 1: Request Letter/ Email from the office of Institute should send to industry to allot slots of 6 weeks during the schedule given by GTU as internship periods for the students. Students request letter/profile/ interest areas may be submitted to industries for their willingness for providing the internship.

Step 2: Industry will confirm the internship slots and the number of students allocated for internships via Confirmation Letter/ Email. In case the students arrange the training themselves, the confirmation letter will be submitted by the students in the department office of the institute.

Step 3: Students on joining internship at the concerned Industry / Organization submit the Joining confirmation Letters / Email to department office.

Step 4: Students will undergo summer internship-II at the concerned Industry / Organization. Faculty mentor(s) evaluate(s) the performance of students and Evaluation Report should be maintained in department office.

Step 5: Students will prepare and submit summer internship-II report after completion of internship.
Step 6: Summer Internship-II Certificate to be obtained from industry and submit it to department office.

7. ROLE AND RESPONSIBILITY OF STUDENT

Summer Internship-II is a student centric activity. Therefore, the major role is to be played by the student.

- The student should interact with mentor to suggest choice for training and suitable Industry/Organization. If students have any contact in the industry/Organization, then same may be utilizes for getting permission for summer Internship for themselves and their peers.
- The students have to fill the consent form duly signed by their parents and submitted to department office of the institute.
- The student should follow all rules/regulation and safety procedures of the Industry/Organization during internship period.
- It is the responsibility of student to collect information from industry about manufacturing process, working of equipment/Equipment specification, raw material, maintenance procedure, organization structure etc.
- In case they face any major problem in the industry such as an accident or any disciplinary issue, they should immediately report the same to the institute.
- The student should prepare a Summer Internship-II report along with Student's Diary/ Weekly Logbook and submit to department at the time of submission.

8. EXPECTED LEARNING AREA FOR THE STUDENT DURING SUMMER INTERNSHIP-II

The following areas are expected to learn by students during summer internship program.

- Organization hierarchy
- Manufacturing process of industry
- Reaction involved in the process.
- Flow diagram of the manufacturing process
- Major equipment involved in the process
- Major utilities used in the plant
- Instrumentation and Control system in the industry
- Raw materials and products handling/ MSDS
- Raw materials and products laboratory testing
- Standard operating procedure of the process/equipment
- Permit System followed in the industry
- Hazards associated in the Industry
- Safety measures followed in the industry
- Awareness about various PPEs used in the industry
- Pollution control and effluent treatment techniques followed in the industry

9. STUDENT'S DIARY/ WEEKLY LOGBOOK

- The main purpose of writing diary is to cultivate the habit of documenting and to encourage the students to search for details. It develops the students thought process and

reasoning abilities.

- The students should record observations, impressions, information gathered and suggestions given, if any. It should contain the sketches & drawings related to the observations made by the students.
- Student's Diary/ WEEKLY LOGBOOK should be submitted by the students along with internship report at the time of submission.
- For sample format of Student's Diary/ Weekly Logbook refer Annexure-3.

10. SUMMER INTERNSHIP REPORT

After completion of Internship, the student should prepare a comprehensive report to indicate what he has observed and learnt in the internship period. Student diary will also help to a great extent in writing the internship report.
The following is the suggestive format for the internship report.

- Cover Page
- Institute Certificate
- Industry completion Certificate
- Student Declaration
- Acknowledgement
- Content page
- Chapters
- Appendix (optional)
- References (optional)

Chapter-1: Introduction to industry/organization (Types of products and services, history, turnover, location and number of employee, Organization structure of industry/organization and general plant layout etc)
Chapter-2: Manufacturing process, reaction along with its process flow diagram
Chapter-3: Major equipments/instruments used in process industries with their standard operating procedure and troubleshooting
Chapter-4: Raw materials and products handling/MSDS
Chapter-5: Safety measures and Work permit system
Chapter-6: Plant Utilities, Instrumentation and Process control system
Chapter-7: Pollution control and effluent treatment techniques

Note: The chapters and content may be change based on Type of Industry/Organization and Area of Internship.

11. EVALUATION

It will be evaluated on the basis of the following criteria:

- Attendance and regularity in maintenance of the student's diary
- Adequacy, quality of information and purposeful write-up/presentation
- Organization of the information, format, drawings, sketches, other information recorded
- Variety and relevance of learning experience/ Depth of knowledge and skills
- Practical applications, relationships with basic theory and concepts taught in the course

12. AFFECTIVE DOMAIN OUTCOMES

The following ***sample*** Affective Domain Outcomes (ADOs) are embedded in many of the above-mentioned COs. More could be added to fulfill the development of this competency.

a) Work as a leader/a team member.
b) Follow ethical practices
c) Follow and Observe safety measures
d) Good house keeping
e) Time management
f) Practice environmentally friendly methods and processes.

13. SUGGESTIVEFORMAT

The following are suggestive format for Summer Internship-II course.
Annexure-1: Student Registration From
Annexure-2: Request Letter from Institute to Industry/Organization
Annexure-3 Student's Diary/ Weekly Logbook
Annexure-4: Summer Internship-II Completion Certificate
Annexure-5: Student Declaration

Subject: Request for 6 Weeks Summer Internship-II for student(s) of Diploma-Chemical Engineering

Dear Sir,

In Diploma-Chemical Engineering program, Gujarat Technological University has introduced Summer Internship-II for the students in the beginning of 5th semester.

In view of the above, I request your good self to allow our following _____student(s) for internship training in your esteemed organization. Kindly accord your permission and give one week time for student(s) to join training after confirmation.

Sr No.	Name of student	Enrollment No.

A line of confirmation will be highly appreciated. You are requested to provide Summer Internship completion certificate to above student(s) after completion of internship period.

With Warm regards,

Authorized Signatory

Date: DD/MM/YYYY

TO WHOM IT MAY CONCERN

This is to certify that _____, Enrollment No._____, a student of chemical Engineering Department, <Institute Name>has successfully completed his/her summer internship-II in the field of <Internship Area/Department>from <Start Date>to<End Date> (Total number of Weeks: ___) under the guidance of <Industry Mentor/Plant Head>.

During the period of her/ his internship program with us, he / she had been exposed to different processes and was found sincere, enthusiastic and dedicated toward work assigned.

We wish him/her every success in his/her life and career.

For <Industry/Organization Name>

[Month,Year]

Following are the guidelines for the preparation Summer Internship-II Report.

PAPER: Use A4 (210mm X 297mm) Paper.

MARGINS: Margins for pages including the regular text should be as below:

Left : 1.25 Inches

Right : 1.0 Inch

Top : 1.0 Inch

Bottom: 1.0 Inch

PREPARATION OF CHAPTERS

Color:

All the text including Tables should be Black prints. However, Graphs and Figures can have color prints.

Font:

Chapter Headings : Times New Roman 16pts, bold print all capitals

Section Headings : Times New Roman 14pts, bold print all capitals

Subsection Headings: Times New Roman 12pts, bold print leading capitals (only first letter in each word should be capital

Regular Text : TimesNewRoman12pts, normal prints

Special Text : Times New Roman Italics 12 pts (for foot notes, symbols, quotes, Mathematical notations….)

Annexture-7: SUGGESTED EVALUATION RUBRICS

Suggested Evaluation Rubrics
(Institute/Industry Mentor)

Enrollment No: _____

Name of Student: _____

Date of Evaluation: _____

Sr. No.	Parameter	Excellent	Good	Average	Poor	Very Poor	Obtained Marks
	Mark	5	4	3	2	1	
1	Student regularity, Proactiveness/ responsiveness towards the given tasks during the Internship period						
2	Regularity in maintenance of the diary/Log book						
3	Quality and organization of information						
4	Purposeful writeup, content, drawing and sketches in the internship report						
5	Depth of technical knowledge and skills						
6	Variety and relevance of learning experience						
7	Quality of presentation						
8	Development of soft skills like communication, presentation, team work/leadership and management skills						
9	Application of basic theory and concepts of chemical engineering						
10	Quality of work/ Practical applications in forms of Outcome achieved.						
	Total Marks Obtained Out of 50 (Minimum Passing Marks: 20)						

Name of Mentor/Examiner:

GUJARAT TECHNOLOGICAL UNIVERSITY (GTU)

Competency-focused Outcome-based Green Curriculum-2021(COGC-2021)
Semester-V

Course Title: Fertilizer Technology
(Course Code: 4350505)

Diploma Programme in which this course is offered	Semester in which offered
Chemical Engineering	5thSemester

1. RATIONALE

Indian economy is dominated by agriculture sector. Synthetic fertilizers are must for producing good crops. Hence it is needed to provide comprehensive and balanced understanding of essential link between chemistry and the synthetic fertilizer industry. It is therefore vital for chemical engineers to understand for each fertilizer product, its flow diagram for Industry production. For this purpose chemical engineers should have skills for arranging treatment, reaction and separation steps in a flow diagram for variety of fertilizers including Nitrogenous fertilizers, Phosphatic fertilizer, Potash Fertilizer, Complex fertilizer and Bio fertilizers is essential. Hence this course is designed to achieve this objective.

2. COMPETENCY

The course content should be taught and curriculum should be implemented with the aim to develop required skills in the students so that they are able to acquire the following competencies:

- Supervise the different stages in fertilizer production

3. COURSEOUTCOMES(COs)

The theory should be taught and practical's should be carried out in such a manner that students are able to acquire different learning outcomes in cognitive, psychomotor and affective domain:

i. Apply the concept of unit process and unit operations for manufacturing of various fertilizers
ii. Characterize fertilizers on the basis of different properties.
iii. Identify engineering problems in various fertilizers manufacturing.
iv. Outline applications of various fertilizer.

4. TEACHING AND EXAMINATION SCHEME

Teaching Scheme(InHours)			Total Credits(L+T+P)	ExaminationScheme				
				Theory Marks		Practical Marks		Total Marks
L	T	P	C	CA	ESE	CA	ESE	
3	-	2	5	30*	70	25	25	150

(*):Out of 30marks under the theory CA,10marks are for assessment of the micro-project to facilitate the integration of COs, and the remaining 20 marks are the average of 2 tests to be taken during the semester for assessing the attainment of the cognitive domain UOs required for the attainment of the COs.

***Legends:** **L**-Lecture; **T** – Tutorial/Teacher Guided Theory Practice; **P** - Practical; **C** – Credit, **CA** -Continuous Assessment; **ESE**-End Semester Examination.*

5. SUGGESTED PRACTICAL EXERCISES

The following practical outcomes (PrOs) are the sub-components of the COs. *Some of the **PrOs** marked **'*'** (in approx. Hrs column) are compulsory, as they are crucial for that particular CO at the 'Precision Level' of Dave's Taxonomy related to 'Psychomotor Domain'*.

Sr. No.	**Practical/Exercise** (Course Outcomes in Psychomotor Domain according to NBA Terminology)	Unit No.	Approx. Hrs Required
1	Prepare chart for fertilizer classification with chemical formula and nutrient content	I	02
2	Estimate nutrient content (% N, %P2O, % K2O) in different fertilizers from their chemical formula	I	02
3	Estimate percentage of Nitrogen in Ammonium chloride by substitution method	II	02
4	Estimate percentage of Nitrogen in Ammonium sulfate by substitution method	II	02
5	Estimate percentage of Nitrogen in Ammonium chloride by back titration	II	02
6	Estimate percentage of Nitrogen in Ammonium sulphate by back titration	II	02
7	Analysis of Urea by Formaldehyde method	II	02
8	Estimate percentage of Nitrogen in Ammonium Chloride/Sulphate by Kjeldhal's method	II	02
9	Estimate biuret content in Urea sample by colour comparison	II	02
10	Estimate ratio from Ammonia to Phosphoric acid in DAP	III	02
11	Prepare potassium sulphate	IV	02
12	Prepare potassium chloride	IV	02
13	Prepare potassium nitrate	IV	02
14	Estimate percentage of Nitrogen in DAP by Formaldehyde method	V	02
15	Estimate percentage of Nitrogen in DAP by Kjeldhal's method	V	02
16	Preparation of Organic fertilizer	VI	02
		Total	**28**

Note:

i. More **Practical Exercises** can be designed and offered by the respective course teacher to develop the industry relevant skills/outcomes to match the COs. The above table is only a suggestive list**.**

ii. The following are some **sample** 'Process' and '#Product' related skills (more may be added/deleted depending on the course) that occur in the above listed **Practical Exercises** of this course required which are embedded in the COs and ultimately the competency.

Sr.No.	Sample Performance Indicators for the PrOs	Weight age in %
1	Handling of apparatus for precise measurements	10
2	Record observations correctly	20
3	Practice and adapt good and safe measuring techniques	10
4	Calculations, Interpretation of results and their conclusion.	20
5	Prepare report of practical in prescribed format	10
6	Solve assignment questions.	20

7	Viva-voce	10
	Total	**100**

6. MAJOR EQUIPMENT/INSTRUMENTS AND SOFTWARE REQUIRED

These major equipment/instruments and Software required to develop PrOs are given below with broad specifications to facilitate procurement of them by the administrators/management of the institutes. This will ensure the conduction of practice in all institutions across the state in a proper ways the desired skills are developed in students.

Sr.No.	Equipment Name with Broad Specifications	PrO. No.
1	Hot Air Oven: Temperature is controlled by digital temperature indicator cum controller from ambient to 250°C with ± 0.1°C Accuracy. Power supply: 220/230V, 50Hz single phase, Capacity (Approx.): 50 – 100 liter, Type of Shelves: 03, Material of Inner Chambers: SS304, Material of Outer Chamber: MS with powder coated paint, Material of Shelves:SS wire mesh	All
2	Laboratory Weighing Balance: Type of Laboratory Balance: Analytical, Sensitivity (mg): 1 mg, Maximum Capacity of weighing (grams): 200 g, Shape of PAN:Circular, PowerSupply: Single Phase, Display: LED.	All
3	Hot Plate With Magnetic Stirrer: Number of stirring Positions:1,Calibration:Automatic Calibration, Magnetic stirrer with a hot plate, Speed Control Accuracy of sets peed (+/-) (RPM): 5, Maximum stirring capacity per position:3000ml,Top plate Material: Stainless steel	All
4	Lab cooling bath: 220V/50HZ, 1.5KW, 370*340*480mm	All
5	Kjeldahl apparatus: Flasks:30ml,50ml,100ml, Heating Element : Kanthal A-1, Heater Watt :200 watt ,Max. Temperature : 350°C	8,16
6	Glassware : Burette, Pipette, Round bottom flask, Conical flask, Beaker, Condensor, Measuring cylinder, Separating funnel.	ALL
7	Accessories: Burner, Stand	All
8	Chemicals: Ammonium chloride, Ammonium sulphate, Urea, DAP,KCL, KOH, NaCl, Indicators	All

7. AFFECTIVE DOMAIN OUTCOMES

The following ***sample*** Affective Domain Outcomes (ADOs) are embedded in many of theabove-mentioned COs and PrOs. More could be added to fulfill the development of thiscompetency.

a) Work as a leader/a team member.
b) Follow ethical practices
c) Observe safety measures
d) Good house keeping
e) Time management
f) Practice environmentally friendly methods and processes.

The ADOs are best developed through laboratory/field-based exercises. Moreover, the level of achievement of the ADOs according to Krathwohl's 'Affective Domain Taxonomy' should gradually increase as planned below:

i. 'Valuing Level' in 1st year

ii. 'Organization Level' in 2nd year.
iii. 'Characterization Level' in 3rd year.

8. UNDER PINNING THEORY

The major underpinning theory is given below based on the higher level UOs of *Revised Bloom'staxonomy* that are formulated for development of the Cos and competency. If required, more such higher-level UOs could be included by the course teacher to focus on the attainment of COs and competency.

Unit	Major Learning Outcomes(Course Outcomes in Cognitive Domain according to NBA terminology)	Topics and Sub-topics
Unit – I Overview of fertilizer	1a. Justify the need for synthetic fertilizer	1.1 Synthetic fertilizers
	1b. Categorize fertilizers	1.2 Classification of fertilizers
	1c. Explain role of essential elements for plant growth	1.3 Role of essential Elements in plant Growth 1.3.1 Macro elements 1.3.2 Micro elements
	1d. Select the relevant fertilizers for the different types of crops	1.4 Application of fertilizers considering nutrient balance and types of crop
Unit – II Nitrogenous Fertilizers	2a. Describe different properties of ammonia, nitric acid and urea 2b. Prepare synthesis path for manufacturing synthesis gas, ammonia, nitric acid and urea 2c. Describe ammonia synthesis converter 2d. Explain storage and transportation of ammonia 2e Estimate concentration of Nitric acid 2f. Describe the engineering problems of ammonia, nitric acid and urea manufacturing	2.1 Physical, chemical properties and applications of ammonia, nitric acid and urea 2.2 Manufacturing of ammonia synthesis gas 2.3 Explain sketch of ammonia synthesis converters 2.4 Manufacturing of ammonia 2.5 Storage and Transportation of Ammonia 2.6 Manufacturing of Nitric Acid 2.7 Concentration of Nitric acid by Mg(NO3) 2.8 Manufacturing of Urea 2.9 Major engineering problems of ammonia, nitric acid and urea manufacturing
	2g. Describe the manufacturing process	2.10 Manufacturing of 2.10.1 Ammonium nitrate 2.10.2 Ammonium sulphate 2.10.3 Ammonium chloride
Unit – III Phosphatic Fertilizer	3a. Describe various physical, chemical properties and uses of Phosphoric acid 3b. Describe the manufacturing process of Phosphoric acid by Wet process and Electric furnace method 3c. Describe the engineering problems of phosphoric acid 3d. Describe the manufacturing Superphosphate and Triple superphosphate	3.1 Physical, chemical properties and applications of phosphoric acid 3.2 Manufacturing phosphoric acid by Wet Process 3.2.1 Strong sulphuric Acid Leaching 3.2.2 Hydrochloric Acid Leaching 3.2.3 Electric Furnace Process 3.3. Major engineering problems of phosphoric acid 3.4. Manufacturing of Superphosphate

		3.5 Manufacturing of Triple superphosphate
Unit – IV Potassic Fertilizers	4a. Describe physical, chemical properties ,manufacturing and uses of potassium chloride, potassium nitrate and potassium sulphate	4.1 Physical, chemical properties, manufacturing and uses of 4.1.1Potassium Chloride 4.1.2 Potassium nitrate 4.1.3 Potassium sulphate
Unit – V Complex Fertilizer	5a. Explain the manufacturing of NPK,ASP,CAN and DAP fertilizers with sketches	5.1 Manufacturing of 5.1.1 NPK fertilizer 5.1.2 Ammonium Sulphate Phosphate (ASP), 5.1.3 Calcium Ammonium Nitrate(CAN) 5.1.4 Di-ammonium phosphate
Unit – VI Bio Fertilizer	6a. Justify the need for biofertilizers and its benefits 6b. Describe the Nitrogen fixing and Phosphate solubilising biofertilizers 6c. Explain preparation a biofertilizers 6d.Explain organic fertilizers	6.1 Types of Biofertilizers 6.2 Biofertilizers: 6.2.1 Nitrogen-fixing biofertilizers 6.2.2 Phosphate solubilizing biofertilizers 6.3 Preparation of a biofertilizers 6.4 List out organic fertilizers 6.5 Outline advantages of organic fertilizers over conventional fertilizer

9. SUGGESTED SPECIFICATION TABLE FOR QUESTION PAPER DESIGN

Unit	Unit Title	Teaching Hours	Distribution of Theory Marks			
			R	U	A	Total
			Level	Level	Level	Marks
I	Overview of fertilizer	4	02	02	02	06
II	Nitrogenous Fertilizers	14	06	10	06	22
III	Phosphatic Fertilizer	8	04	06	04	14
IV	Potassic Fertilizers	5	03	04	03	10
V	Complex Fertilizer	6	02	06	02	10
VI	Bio Fertilizer	5	02	04	02	8
	Total	**42**	**19**	**32**	**19**	**70**

Legends: *R=Remember, U=Understand, A=Apply and above (Revised Bloom's taxonomy)*

Note*: This specification table provides general guidelines to assist students for their learning and to teachers to teach and question paper designers/setters to formulate test items/questions to assess the attainment of the UOs. The actual distribution of marks at different taxonomy levels (of R, Uand A)in the question paper may slightly vary from above table.*

10. SUGGESTED STUDENT ACTIVITIES

Other than the classroom and laboratory learning, following are the suggested student-related ***co-curricular*** activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should perform following activities in group and prepare reports of about 5 pages for each activity. They should also collect/record physical evidences for their (student's) portfolio which may be useful for their placement interviews:

Following is the list of proposed student activities like:

1. Assignments
2. Technical Quiz/MCQ Test
3. Presentation on some course topic

4. I-net based assignments
5. Undertake micro-Project in team/individually

11. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:

a) Massive open online courses (*MOOCs*) may be used to teach various topics/subtopics.
b) Guide student(s) in undertaking micro-projects/activities.
c) Different types of teaching methods i.e. video demonstration, activity based learning, case study, m-learning need to be employed by teachers to develop the outcomes.
d) Some *of the topics/sub-topics* which are relatively simpler or descriptive are to be given to the students for *self-learning* but to be assessed using different assessment methods.
e) Teachers need to ensure to create opportunities and provisions for *co-curricular activities*.
f) Guide students to address issues on environment and sustainability with reference to using the knowledge of this course
g) OERs, Vlab, and Olabs may be used to teach for the teaching of different concepts.

12. SUGGESTED MICRO-PROJECTS

Only one micro-project is planned to be undertaken by a student that needs to be assigned to him/her at the beginning of the semester. In the first four semesters, the micro-project is group-based (group of 3 to 5). However, **in the fifth and sixth semesters**, the number of students in the group should ***not exceed three.***

The micro-project could be industry application-based, internet-based, workshop-based, laboratory-based, or field-based. Each micro-project should encompass two or more COs which are the integration of PrOs, UOs, and ADOs. Each student will have to maintain a dated work diary consisting of individual contributions in the project work and give a seminar presentation of it before submission. The duration of the microproject should be about **14-16** ***(fourteen to sixteen) student engagement hours*** during the course. The student sought to submit micro-project by the end of the semester (so that they develop industry-oriented COs.

A suggestive list of micro-projects is given here. This should relate highly to the competency of the course and the COs. Similar micro-projects could be added by the concerned course teacher.

1) Prepare a chart of the properties of given product
2) Prepare a chart to demonstrate manufacturing process.
3) Prepare a report on major engineering problem of given manufacturing process
4) Prepare a chart of application of given products
5) Prepare a power point presentation on a topic “List of Fertilizer manufacturing industries in India”
6) Prepare a PowerPoint presentation or animation showing different types of Fertilizer manufacturing Process
7) Library survey regarding fertilizers in different industries
8) Prepare a model of different fertilizers product flow diagram

13. SUGGESTEDLEARNINGRESOURCES

Sr. No.	TitleofBooks	Author	Publication with place, year and ISBN
1	Outlines of Chemical Technology, 3rd edition	M. Gopala Rao, Marshall Sitting	Affiliated East West Press (Pvt) Ltd-New Delhi

GUJARAT TECHNOLOGICAL UNIVERSITY (GTU)

Competency-focused Outcome-based Green Curriculum-2021 (COGC-2021)
Semester-III

Course Title: Plant Utilities
(Course Code: 4330505)

Diploma programmer in which this course is offered	Semester in which offered
Plant Utilities	Third

1. RATIONALE

Diploma chemical engineer has to ensure smooth and proper operation of utilities and auxiliaries' plants such as steam, compressed air, instrumental air, inert gases, DM water and chilled water. These utilities are essential for manufacturing different chemical products. Use of concept of energy efficiency and green chemistry are necessary for energy conservation in chemical plant for producing materials of desired quality and to maintain plant safety. Hence the course has been design to develop these competencies and its associated cognitive and effective domain learning outcomes.

2. COMPETENCY

The course should be taught and implemented with the aim to develop required skills in students so that they are able to acquire following competency:

- **Use different utilities in chemical process plants for various applications.**

3. COURSE OUTCOMES (COs)

The practical exercises, the underpinning knowledge and the relevant soft skills associated with the identified competency are to be developed in the student for the achievement of the following COs:

a) Select Various Methods For Water Softening And Purification.
b) Explain Different Types of Steam Generators and Compressors along with their components.
c) Select Refrigeration For Various Applications.
d) Apply concepts of energy efficiency and green chemistry for conservation of utilities.

4. TEACHING AND EXAMINATION SCHEME

Teaching Scheme (In Hours)			Total Credits (L+T+P/2)	Examination Scheme				
				Theory Marks		Practical Marks		Total Marks
L	T	P	C	CA	ESE	CA	ESE	
2	0	0	2	30	70	0	0	100

(*): For this practical only course, 50 marks under the practical CA have two components i.e. the assessment of micro-project, which will be done out of 10 marks and the remaining 15

marks are for the assessment of practical. This is designed to facilitate attainment of COs holistically, as there is no theory ESE.

Legends: ***L****-Lecture;* ***T*** *– Tutorial/Teacher Guided Theory Practice;* ***P*** *-Practical;* ***C*** *– Credit,* ***CA*** *- Continuous Assessment;* ***ESE*** *-End Semester Examination.*

5. SUGGESTED PRACTICAL EXERCISES

Following practical outcomes (PrOs) are the sub-components of the Course Outcomes (Cos). Some of the **PrOs** marked **'*'** are compulsory, as they are crucial for that particular CO at the 'Precision Level' of Dave's Taxonomy related to 'Psychomotor Domain'.

Sr. No.	Practical Outcomes (PrOs)	Unit No.	Approx. Hrs. Required
	Not applicable		

Note

i. More ***Practical Exercises*** *can be designed and offered by the respective course teacher to develop the industry relevant skills/outcomes to match the COs. The above table is only a suggestive list.*

ii. Care must be taken in assigning and assessing study report as it is a first year study report. Study report, data collection and analysis report must be assigned in a group. Teacher has to discuss about type of data (which and why) before group start their market survey.

6. MAJOR EQUIPMENT/ INSTRUMENTS REQUIRED

These major equipments with broad specifications for the PrOs is a guide to procure them by the administrators to user in uniformity of practical's in all institutions across the state.

Sr. No.	Equipment Name with Broad Specifications	PrO. No.
1.	**Not applicable**	

7. AFFECTIVE DOMAIN OUTCOMES

The following ***sample*** Affective Domain Outcomes (ADOs) are embedded in many of the above-mentioned COs and PrOs. More could be added to fulfill the development of this course competency.

a) Follow ethical practices.
b) Practice good housekeeping.
c) Demonstrate working as a leader/a team member during brain storming.

The ADOs are best developed through the laboratory/field based exercises. Moreover, the level of achievement of the ADOs according to Krathwohl's 'Affective Domain Taxonomy' should gradually increase as planned below:

i. 'Valuing Level' in 1st year
ii. 'Organization Level' in 2nd year.

iii. 'Characterization Level' in 3rd year.

8. UNDERPINNING THEORY

The major Underpinning Theory is formulated as given below and only higher level UOs of *Revised Bloom's taxonomy* are mentioned for development of the COs and competency in the students by the teachers. (Higher level UOs automatically include lower level UOs in them). If required, more such higher level UOs could be included by the course teacher to focus on attainment of COs and competency.

Unit	Unit Outcomes (UOs) (4 to 6 UOs at Application level)	Topics and Sub-topics
Unit – I Water as Basic Utility	1.a Explain role of Utilities in Chemical Plant 1.a.1 List various utilities in chemical plant & uses 1.b List sources of Water 1.c Differentiate types of Water 1.d Compare Softening processes of water 1.e Explain the process of Purification of water. 1.f Classify conventional and green techniques for sterilization of water.	1.1 List and use of various utilities in chemical plant 1.2 Sources of water 1.3 Hard & Soft water 1.4 Boiler Feed water and demineralized water 1.5 Methods of water softening processes 1.5.1 Lime soda process (Hot & Cold) 1.5.2 Zeolite process 1.5.3 Ion exchange process 1.5.4 Phosphate process 1.6 Purification of water 1.6.1 Screening 1.6.2 Sedimentation 1.6.3 Coagulation 1.6.4 Filtration 1.6.5 Sterilization 1.7 Conventional techniques 1.7.1 Sterilization by chlorine 1.7.2 Sterilization using bleaching powder 1.7.3 Sterilization by chloramines solution 1.8 Green techniques 1.8.1 Sterilization using UV rays 1.8.2 Sterilization using Ozon

Unit	Unit Outcomes (UOs) (4 to 6 UOs at Application level)	Topics and Sub-topics
Unit – II Steam, Air & Inert Gases	2.a Explain uses of utilities like Steam, Air & Inert Gases 2.b Define properties of steam 2.c Label the different part of steam generator 2.d Classify steam generator 2.e Compare steam generators 2.f List the Factors affecting selection of Boiler 2.g Describe boiler accessories and mountings for improving efficiency and conservation of energy. 2.h Discuss utility air 2.i Describe the working principle, application of Air compressors – 2.i.1 Explain energy efficient alternative 2.j Describe properties of Inert gases	2.1 Use of Steam, Air & Inert Gases as utilities 2.2 Properties of steam 2.2.1 Enthalpy 2.2.2 Wet steam 2.2.3 Saturated Steam 2.2.4 Superheated steam 2.2.5 Specific volume of steam 2.3 Steam Generator : Classification, comparison , components, steam handling, condensate removal 2.4 Factors affecting selection of Boiler 2.5 Boiler Accessories and mountings 2.5.1 Air Pre heater 2.5.2 Super heater 2.5.3 Economizer 2.5.4 Steam trap 2.6 Utility air 2.6.1 Compressed Air 2.6.2 Blower Air 2.6.3 Fan Air 2.6.4 Instrumental air 2.7 Types of Air compressors 2.7.1 Reciprocating Air compressors 2.7.2 Rotary compressors 2.8 Energy efficient air compressor 2.8.1 Multistage compressors 2.9 Inert gas - Nitrogen, Argon
Unit – III Refrigeration	3.a Explain the working principle of Refrigeration 3.b Distinguish methods of Refrigeration 3.c Describe and TOR of refrigeration 3.d Use primary and secondary Refrigerants and list out green refrigerants 3.d.1 Explain advantages of green refrigerants over conventional refrigerants	3.1 Concept of refrigeration 3.2 Methods of Refrigeration 3.2.1 Ice Refrigeration 3.2.2 Evaporative Refrigeration 3.2.3 Vapor Refrigeration System 3.3 TOR of refrigeration 3.4 Types of Primary Refrigerants 3.4.1 Ammonia 3.4.2 Halo Carbons (Freon of Different type) 3.4.3 HFC (Hydro Fluorocarbon) 3.5 Types of secondary Refrigerants 3.5.1 Water 3.5.2 Brine 3.6 Selection of Refrigerants

***Note**: The UOs need to be formulated at the 'Application Level' and above of Revised Bloom's Taxonomy' to accelerate the attainment of the COs and the competency.*

9. SUGGESTED SPECIFICATION TABLE FOR QUESTIONPAPER DESIGN

Unit	Unit Title	Teaching Hours	Distribution of Theory Marks			
			R Level	U Level	A Level	Total Marks
I	Water as Basic Utility	10	10	10	6	26
II	Steam, Air & Inert Gases	12	10	10	9	29
III	Refrigeration	6	4	6	5	15
Total		**28**	**24**	**26**	**20**	**70**

10. SUGGESTED STUDENT ACTIVITIES

Other than the classroom and laboratory learning, following are the suggested student-related ***co-curricular*** activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should perform following activities in group and prepare reports of about 5 pages for each activity. They should also collect/record physical evidences for their (student's) portfolio which may be useful for their placement interviews:

a) Undertake micro-projects in team/individually.
b) Encourage Students for creating and designing water treatment processes using wastematerials.
c) Students are encouraged to register themselves in various MOOCs such as: Swayam, edx, Coursera, Udemy etc to further enhance their learning.

11. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:

a) Guide student(s) in undertaking micro-projects.
b) Diagnosing Essential Missed Learning concepts that will help for students to improve their performance.
c) Guide Students to do Personalized learning so that students can understand the course material at his or her pace.
d) Encourage students to do Group learning by sharing so that learning can be enhanced.
e) About ***20% of the topics/sub-topics*** which are relatively simpler or descriptive in nature is to be given to the students for ***self-learning***, but to be assessed using different assessment methods. Guide students on addressing the issues on environment and sustainability using the knowledge of this course.

12. SUGGESTED MICRO-PROJECTS

Only one micro-project is planned to be undertaken by a student that needs to be assigned to him/her in the beginning of the semester. In the first four semesters, the micro-project is group-based (group of 3 to 5). However, **in the fifth and sixth semesters**, the number of students in the group should ***not exceed three.***

The micro-project could be industry application based, internet-based, workshop- based, laboratory-based or field-based. Each micro-project should encompass two or more COs which are in fact, an integration of PrOs, UOs and ADOs. Each student will have to maintain dated work diary consisting of individual contribution in the project work and give a seminar presentation of it before submission. The duration of the microproject should be about **14-16** ***(fourteen to sixteen) student engagement hours*** during the course. The students ought to submit micro-project by the end of the semester to develop the industry-oriented COs.

A suggestive list of micro-projects is given here. This has to match the competency and the COs. Similar micro-projects could be added by the concerned course teacher:

MICRO PROJECT 1: Identify sources of water at your college premises and measure thefollowing physical properties.

1. Measure temperature of water.
2. Measure TDS of water.
3. Measure pH of water.
4. Measure turbidity of water.

MIICRO PROJECT 2: Perform basic treatment techniques for purification of water.

MICRO PROJECT 3: Prepare 15-20 slides presentation showing classification of refrigeration & refrigerants.

13. SUGGESTED LEARNING RESOURCES

Sr. No.	Title of Book	Author	Publication with place, year and ISBN

GUJARAT TECHNOLOGICAL UNIVERSITY (GTU)

Competency-focused Outcome-based Green Curriculum-2021 (COGC-2021)
Semester-III

Course Title: Summer Internship-I
(Course Code: 4330001)

Diploma programme in which this course is offered	Semester in which offered
All Branches of Diploma Engineering(Except Automobile, Bio Medical, ICT, Power)	Third

1. RATIONALE

Idea of Embedded Internships- AICTE has made 7-10 weeks summer internships mandatory in the new curriculum which will equip the students with practical understanding and training about industry practices in a suitable industry or organization. To make education holistic, sports, physical activities, values and ethics have been embedded in the curriculum.

We must agree that all Branches of Diploma Engineering are changing rapidly. New technologies are adding fast which effects can be seen in our society. Summer internship is a good option by which students to get flavor of such emerging technology and familiar with industry environment to identify scope and focus of their career development opportunities. Main objective of summer internship is hand-on practice to expose students for thinking about professional career by observing, understanding working mechanism of ongoing work of industry and to obtain various types of skills throughout internship program.

This two week mandatory internship is to equip the students with practical knowledge and provide them exposure to real time industrial environments. Further, in these internships, the option is provided to do internship in Government Agencies/ skill centers/ social sector/ Govt. initiated social schemes/ NGOs etc. The duration of internship will be two weeks. It will be after completion of 2nd Semester and before the commencement of Semester 3rd. Any options from following can be chosen by the students:

1. **Offline internship in industry** - Student is supposed to produce joining letter for starting and relieving letter once the internship is over in case of Offline internship in any industry.
2. **Online internships –** Student can select from any of approved /supported / recommended by the All India Council of Technical education for Internship (like Internshala/ NEAT/ Gujarat Knowledge Society Initiative etc.) or Approved by the state government or University approved
3. **A Mini Project** - On some suitable topic related to respective branch. It can be small fabrication / experimental results/ simulations/ Application development / Design and / or Analysis of System(s) etc. depending on the branch of the student. Preferably a single student should carry out a mini-project.

2. COMPETENCY

The purpose of this course is to help the student to attain flavor of the following industry identified competency through summer internship experiences:

- **Develop multiple types of skills such as planning, communication, collaboration, decision making / Problem solving and management skills along with selected technical knowledge.**

3. COURSE OUTCOMES (COs)

The practical exercises, the underpinning knowledge and the relevant soft skills associated with the identified competency are to be developed in the student for the achievement of the following COs:

a) Learn and adopt the engineer's role and responsibilities with ethics.
b) Get exposure to the industrial environment for professional activities.
c) Get possible opportunities to learn, understand and sharpen the technical skills required for technical advancement.
d) Develop managerial skills required for professional career.
e) Attain skill for writing technical report and prepare poster for presentation.

4. TEACHING AND EXAMINATION SCHEME

Teaching Scheme (In Hours)			Total Credits (L+T+P/2)	Examination Scheme				
				Theory Marks		Practical Marks		Total Marks
L	T	P	C	CA	ESE	CA	ESE	
0	0	0	1	0	0	25	25	50

1. **Offline internship in industry:** CA will be carried out based on submitted progress card by Industry resource person and ESE / Assessment will be carried out by institute resources person.
2. **Online internships:** CA will be carried out based on submitted certificate and ESE/ Assessment will be carried out by institute resources person.
3. **A Mini Project:** CA will be carried out based on project work by institute resources person.

Legends: ***L****-Lecture;* ***T*** *– Tutorial/Teacher Guided Theory Practice;* ***P*** *-Practical;* ***C*** *– Credit,* ***CA*** *- Continuous Assessment;* ***ESE*** *-End Semester Examination.*

List of Documents to be prepared for Submission:

- Detail report duly signed and approved by the internal/external mentor
- Presentation softcopy approved by the internal/external mentor
- Poster of summer internship activities approved by the internal/external mentor.

Sample forms for Registration and Evaluation of Summer Internship-I –SI-I are given below:

1) Both forms are mandatory to be filled at the commencement and completion of SI respectively.
2) It is mandatory to file and map SI-I Registration and Evaluation with respective forms of SI-II (Later in Semester 5) so that students get enough exposure of industry / technology. (Mapping doesn't mean same industry/ company/ project-it can be independent/ different also.)
3) Mapping will be done to ease CA and ESE Evaluations.
4) A Seminar / Webinar can be arranged so that students coming from different industry / institute / project background can share experiences and learnings to their peers / all students of the same department.
5) Attached formats for Registration, Completion and Evaluation are suggestive. But, adhering to these formats is anticipated.

Summer Internship-I Registration Form

Note: Students needs to submit this registration form after finalizing mode of internship.

Summer Internship-I -Evaluation Rubrics for Institute

Evaluation Rubrics (Institute)

Enrollment No: _____ Branch: _____

Name of the Students: _____

Date of Evaluation: _____

Internal Evaluation – 25 Marks PA(I) (To be carried out by the mentor in consultation with Industry) Minimum Passing Marks: 13					
Parameter	**Excellent**	**Good**	**Average**	**Not up the level of Satisfaction**	**Obtained Marks**
Mark range	**4-5**	**3-4**	**2-3**	**Below 2**	
Knowledge acquisition in specific domain. **5 marks**					
Skill and attitude attainment in specific domain. **5 marks**					
Feedback and suggestions given are incorporated? **5 marks**					
Quality of the prepared report and poster. **5 marks**					
Quality of the presentation. **5 marks**					
Total Marks Obtained Out of 25 PA(I)					

Signature: _____ Institute Resource Examiner Name: _____

Suggested Evaluation Rubrics for Industry

Evaluation Rubrics (Industry)

Enrollment No: _____ Branch: _____

Name of the Students: _____

Date of Evaluation: _____

External Evaluation – 25 Marks ESE(V) (To be carried out by the Industry Supervisor) Minimum Passing Marks: 13					
Parameter	**Excellent**	**Good**	**Average**	**Not up the level of Satisfaction**	Obtained Marks
Mark range	**4-5**	**3-4**	**2-3**	**Below 2**	
Student regularity during the Internship period and proactive ness/responsiveness towards the given tasks (**5 Marks)**					
Work Plan, Execution and quality of work in forms of Outcome achieved (**5 Marks)**					
Engineering Tools and Techniques (**5 Marks)**					
Quality of poster design and presentation (**5 Marks)**					
Quality of the report and Skill **(5 Marks)**					
Total Marks Obtained Out of 25 ESE(V)					

Signature: _____ Industry resource/ Examiner Name: _____

Common Note:

1) For Summer Internship / Projects / Seminar etc. Evaluation is based on work done, quality of report, performance in viva-voce, presentation etc. The internal / external assessment is based on the student's performance in viva-voce /work record respectively.
2) In case Industry Supervisor is not available / Institute Mentor/ Faculty can fill up both.

5. AFFECTIVE DOMAIN OUTCOMES

The following affective Domain Outcomes (ADOs) are embedded in many of the above mentioned COs. More could be added to fulfill the development of this course competency.

a) Work as a leader/a team member as role of Engineer.
b) Practice environmentally friendly methods and processes.
Follow safety precautions and ethical practices.

6. SUGGESTED STUDENT ACTIVITIES

Following are the suggested student-related curricular, **co-curricular** activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should perform following activities and prepare reports and give presentation in front of students and faculty members. They should also collect/record physical evidences for their (student's) portfolio which may be useful for their placement interviews:

a) Perform various tasks given by industry resources person during offline internship.
b) Perform various tasks given during online internship.
c) Perform various task required to complete mini project work under guidance of faculty member.
d) Summer Internship program Interns are required to give a presentation before review committee consisting of a group of academic staff members.
e) The review committee gives feedback and suggests possible improvements in the work.
f) At the end of the program all the Summer Internship program Interns make a poster presentation of the work carried out. The poster presentation is open to the public. It is also evaluated by faculty members.
g) A completion certificate will be issued to all Summer Internship program Interns only after the completion of internship tenure.

7. SOFTWARE / LEARNING WEBSITES

An internship is a short term work program usually offered to students by companies and institutes who require staff for assistance at junior levels. Thus for the students undergoing internship a professional learning experience is provided to benefit them in their skills as well as career. It will brush existing skills and provide exposure to new skills. Generally it is provided ay entry level in the industry.

GUJARAT TECHNOLOGICAL UNIVERSITY (GTU)

Competency-focused Outcome-based Green Curriculum-2021 (COGC-2021)
Semester-III

Course Title: Mechanical Operation
(Course Code: 4330501)

Diploma programmer in which this course is offered	Semester in which offered
Chemical Engineering	Third

1. RATIONALE

The operations of chemical plants require use of material handling and size reduction equipments, screens, agitator, mixers, centrifuges, cyclones, filters, storage & conveying of solids and other mechanical separation equipments. Therefore students must have information about the principles, construction, working and application of these equipments so that they can plan for their efficient use in plants. In this course the students would also learn simple calculations to judge the performance of these equipments.

2. COMPETENCY

The course content should be taught and implemented with the aim to develop different types of skills so that students are able to acquire following competencies:

- **Plan and supervise operation of mechanical operation equipments.**

3. COURSE OUTCOMES (COs)

The practical exercises, the underpinning knowledge and the relevant soft skills associated with the identified competency are to be developed in the student for the achievement of the following COs:

a) Use fundamentals of mechanical operation.
b) Apply concept of size reduction, separation, agitation-mixing, Storage and Conveying of Solid & Fluid.
c) Operate size reduction equipment, separators, agitators, mixers and conveyors.
d) Calculate properties of solid particles, power consumption, and resistance, crushing law constants, efficiency and material balance.

4. TEACHING AND EXAMINATION SCHEME

Teaching Scheme (In Hours)			Total Credits (L+T+P/2)	Examination Scheme				
				Theory Marks		Practical Marks		Total Marks
L	T	P	C	CA	ESE	CA	ESE	
3	0	4	5	30	70	50	50	200

(*): Out of 30 marks under the theory CA, 10 marks are for assessment of the micro-project to facilitate the integration of COs, and the remaining 20 marks are the average of 2 tests to be taken during the semester for assessing the attainment of the cognitive domain UOs required for the attainment of the COs.

Legends: L-Lecture; T – Tutorial/Teacher Guided Theory Practice; P - Practical; C – Credit, CA - Continuous Assessment; ESE - End Semester Examination.

5. SUGGESTED PRACTICAL EXERCISES

The practical/exercises should be properly designed and implemented with an attempt to develop different types of practical skills **(Course Outcomes in psychomotor and affective domain)** so that students are able to acquire the competencies **(Programme Outcomes).** Following is the list of practical exercises for guidance.

Note: Here only Course Outcomes in psychomotor domain are listed as practical/exercises. However, if these practical/exercises are completed appropriately, they would also lead to development of Programme Outcomes/Course Outcomes in affective domain as given in a common list at the beginning of curriculum document for this programme. Faculty should refer to that common list and should ensure that students also acquire those Programme Outcomes/Course Outcomes related to affective domain.

Sr. No.	Practical Outcomes (PrOs)	Unit No.	Option	Approx. Hrs. Required
1.	Measure volume surface mean diameter, mass mean diameter, number of particles using a sieve shaker.	I		**4**
2.	Perform differential and cumulative screen analysis	III		**4**
3.	Test Kicks law for crushing in Jaw crusher.	II		**4**
4.	Test Bond's law for crushing in a Roll crusher.	II		**4**
5.	Test Rittinger's law for grinding in a Ball mill and measure critical speed.	II		**4**
6.	Measure efficiency and cut diameter of Cyclone Separator.	IV		**4**
7.	Determine rate of settling by Sedimentation.	IV		**4**
8.	Measure rate of filtration, filter medium & cake resistance in Gravity filtration.	IV	**Any three**	**4**
9.	Measure rate of filtration, filter medium & cake resistance in Vacuum filtration.	IV		**4**
10.	Measure cake resistance, filter media resistance in Pressure filtration.	IV		**4**
11.	Measure rate of filtration, cake resistance, filter media resistance in Centrifuge.	IV		**4**
12.	Measure efficiency of separation in froth flotation cell.	III	**Any two**	**4**
13.	Measure efficiency of separation in Magnetic separator.	III		**4**
14.	Measure efficiency of separation in Electrostatic separator.	III		**4**

15.	Evaluate mixing index in mixer.	V		**4**
16.	Measure power consumption in baffled and unbaffled Agitation vessel.	V		**4**

Note

*More **Practical Exercises** can be designed and offered by the respective course teacher to develop the industry relevant skills/outcomes to match the COs. The above table is only a suggestive list.*

6. MAJOR EQUIPMENT/ INSTRUMENTS REQUIRED

These major equipments with broad specifications for the PrOs is a guide to procure them by the administrators to use in uniformity of practical's in all institutions across the state.

Sr. No.	Equipment Name with Broad Specifications	PrO. No.
1	Sieve shaker – Sieve dia – 100 mm to 200 mm, no of sieve – 6-8 and Pan, Opening – as per standards (micro or coarse particle)	1,2
2	Jaw crusher – 10-50 kg/hr capacity, Suitable for operation on 415V, 50Hz, 3 Phase, AC supply with energy meter	3
3	Laboratory Roll crusher – 5-25 kg/hr capacity, Suitable for operation on 415V, 50Hz, 3 Phase, AC supply with energy meter	4
	Laboratory Ball mill - 5kg capacity, Suitable for operation on 415V, 50Hz, 3 Phase, AC supply with energy meter	5
4	Cyclone separators – Product Particle as per requirement, Suitable for operation on 220V, Power: 1000W with energy meter	6
5	Batch Sedimentation Set up (Lab Scale Model using Glassware)	7
6	Gravity filter (Lab scale model using Glassware)	8
7	Vacuum Filter (Lab scale model using Glassware and Vacuum pump)	9
8	Laboratory filter Press - Suitable for operation on 220V, Power: 1000W	10
9	Basket centrifuge - Suitable for operation on 415V, 50Hz, 3 Phase, AC supply	11
10	Froth flotation Cell, 5-15 kg/hr capacity, Suitable for operation on 220V, Power: 1000W with energy meter	12
11	Magnetic separator suitable for operation on 220V, Power: 1000W	13
12	Electrostatic separator.	14

Sr. No.	Equipment Name with Broad Specifications	PrO. No.
13	Double cone mixer - Suitable for operation on 220V, Power: 1000W	15
14	Ribbon Blender- Suitable for operation on 220V, Power: 1000W	15
15	Sigma Mixer- Suitable for operation on 220V, Power: 1000W	15
16	Agitation vessel setup – Suitable for operation on 220V, Power: 1000W with energy meter (with removable baffles)	16

7. AFFECTIVE DOMAIN OUTCOMES

The following ***sample*** Affective Domain Outcomes (ADOs) are embedded in many of the above-mentioned COs and PrOs. More could be added to fulfill the development of this course competency.

a) Follow ethical practices.
b) Practice good housekeeping.
c) Demonstrate working as a leader/a team member during brainstorming.

The ADOs are best developed through the laboratory/field based exercises. Moreover, the level of achievement of the ADOs according to Krathwohl's 'Affective Domain Taxonomy' should gradually increase as planned below:

i. 'Valuing Level' in 1st year
ii. 'Organization Level' in 2nd year.
iii. 'Characterization Level' in 3rd year.

8. UNDERPINNING THEORY

The major Underpinning Theory is formulated as given below and only higher level UOs of *Revised Bloom's taxonomy* are mentioned for development of the COs and competency in the students by the teachers. (Higher level UOs automatically include lower level UOs in them). If required, more such higher level UOs could be included by the course teacher to focus on attainment of COs and competency.

Unit	Unit Outcomes (UOs)	Topics and Sub-topics
Unit – I Fundamental of Mechanical Operation	1a. Define Unit Operation and Unit Process 1b. Differentiate Unit Operation and Unit Process	1.1 Fundamentals of Unit Operation and Unit Process 1.2 Examples of Unit Operation and Unit Process
	1c. Describe specific properties of solids	1.3 Define & Calculate ● Particle density and Bulk density

		● Sphericity ● Equivalent diameter ● Specific surface area ● Volume surface mean diameter ● Mass mean diameter ● Shape factor ● Number of particles in solid
Unit– II Size Reduction	2a. Explain size reduction with applications	2.1 Principles of Size reduction and its application
	2b. Select Size reduction equipments	2.2 Factors for selection of size reduction equipment
	2c. Calculate Energy and power requirement in comminution	2.3 Energy and power requirement in comminution
	2d. Explain Empirical laws of size reduction and work Index	2.4 Laws of size reduction: (i) Rittinger's law (ii) Bond's law (iii) Kick's law 2.5 Calculate Power required for size reduction using empirical laws and calculation of work Index.
	2e. Explain Different Size reduction equipments	2.6 Principle, construction, working and Application of ● Jaw crusher ● Gyratory crusher ● Roll Crusher ● Ball mill ● Hammer mill
	2f. Compute Angle of nip for Roll Crusher	2.7 Derive equation of angle of nip 2.8 Calculation of angle of nip for Roll crusher
	2g. Calculate Critical speed of Ball mill	2.9 Derivation of equation of critical speed for Ball Mill 2.10 Calculation of operating speed and critical speed for Ball Mill
	2h. Explain Open and Close circuit grinding	2.11 Difference between open circuit and close circuit grinding
Unit– III Solid-Solid separation	3a. Explain Screening 3b. Compare types of screen analysis 3c. Derive formula for	3.1 Basics of Ideal and Actual Screen 3.2 Types of Screen Analysis ● Cumulative analysis ● Differential analysis 3.3 Capacity and effectiveness of

	effectiveness of screen 3d. Calculate capacity and effectiveness of screen 3e. Explain different screening equipment	screen ● Derivation of formula for overall effectiveness of screen ● Calculation of capacity and effectiveness of screen 3.4 Principle, Construction, Working & Application of ● Trommel, grizzlies, vibrating screen
	3b. Explain different Solid separation equipments	3.5 Principle, Construction, Working & Application of ● Hydraulic Jig ● Double cone classifier ● Electrostatic precipitator ● Magnetic separator ● Froth flotation cell
	3c. Select solid separation equipment	3.6 Factors affecting selection of equipment for solid separation
Unit– IV Solid- fluid Separation	4a. Describe filtration and Differentiate constant rate and constant pressure filtration 4b. Characterize filter media 4c. Explain filter aids and its application 4d.Explain cake resistance, filter media resistance for various conditions 4e. Classify equipments for liquid-solid separation	4.1 Basics of filtration ● Constant Rate filtration ● Constant Pressure filtration 4.2 Filter media and its characteristics 4.3 Filter Aid & its application 4.4 Cake Resistance, Filter medium Resistance ● Constant Rate filtration ● Constant Pressure filtration 4.5 Principle, construction, working and application of ● Filter Press ● Rotary Drum Filter ● Leaf Filter ● Basket Centrifuge
	4f. Explain sedimentation 4g. Draw batch sedimentation curve 4h. Explain Gravity Thickener	4.6 Basic of Sedimentation ● Hindered settling ● Free settling 4.7 Batch Sedimentation Experiment ● Interphase height Vs Time curve for batch sedimentation 4.8 Principle, construction,

		working and application of Gravity Thickener
	4i. Explain Terminal settling velocity	4.9 Terminal settling velocity
	4j. Describe Cyclone Separator	4.10 Principle, construction, working and application of Cyclone Separator
	4k. Calculate Cut diameter and efficiency of cyclone	4.11 Cut diameter and Efficiency ofCyclone Separator
Unit– V Agitation and mixing	5a. Describe agitation and mixing 5b. Classify impellers 5c. Compare various impellers 5d. Explain vortex formation and prevention 5e. Explain factors affecting agitation 5f. Calculate power consumption 5g. Describe Agitated vessel	5.1 Define agitation and mixing 5.2 Classification of Impellers and brief explanation 5.3 Vortex formation and swirling 5.4 Methods for Prevention of Vortex 5.5 Factors affecting on agitation and Mixing 5.6 Calculation of Mixing index & Power Consumption 5.7 Principle, construction, working and application of Agitated vessel
	5h. Explain different Types of Mixers	5.8 Principle, construction, working and application of ● Ribbon blender ● Kneaders ● Banbury mixer ● Muller mixer
Unit VI Storage & Conveying of Solid and Fluid	6a. Describe different Storage of Solids	6.1 Angle of repose 6.2 Bulk storage 6.3 Storage in bins and silos
	6b Explain different types of Conveyor	6.4 Types of Conveyors ● Screw conveyors ● Belt conveyors ● Bucket elevators ● Pneumatic conveyor ● Hydraulic Conveyor

***Note**: The UOs need to be formulated at the 'Application Level' and above of Revised Bloom's Taxonomy' to accelerate the attainment of the COs and the competency.*

9. SUGGESTED SPECIFICATION TABLE FOR QUESTIONPAPER DESIGN

Unit	Unit Title	Teaching Hours	Distribution of Theory Marks			
			R Level	U Level	A Level	Total Marks
I	Fundamental of Mechanical Operation	04	2	2	3	07
II	Size Reduction	10	4	5	8	17
III	Solid-Solid Separation	07	3	4	4	11
IV	Solid-Fluid Separation	10	4	5	8	17
V	Agitation and Mixing	07	3	5	3	11
VI	Storage and Conveying	04	2	3	2	07
Total		**42**	**18**	**24**	**28**	**70**

10. SUGGESTED STUDENT ACTIVITIES

Other than the classroom and laboratory learning, following are the suggested student-related ***co-curricular*** activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should perform following activities in group and prepare reports of about 5 pages for each activity. They should also collect/record physical evidences for their (student's) portfolio which may be useful for their placement interviews:

Following is the list of proposed student activities like:

1. Assignments
2. Technical Quiz/MCQ Test
3. Presentation on some course topic
4. I-net based assignments
5. Undertake micro-Project in team/individually
6. Students are encouraged to register themselves in various MOOCS such as: Swayam, edx, Coursera, Udemy etc to further enhance their learning

11. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:

a) Guide student(s) in undertaking micro-projects.
b) Diagnosing Essential Missed Learning concepts that will help for students to improve their performance.
c) Guide Students to do Personalized learning so that students can understand the course material at his or her pace.
d) Encourage students to do Group learning by sharing so that learning can be enhanced.
e) About ***20% of the topics/sub-topics*** which are relatively simpler or descriptive in nature is to be given to the students for ***self-learning***, but to be assessed using different assessment methods. Guide students on addressing the issues on environment and sustainability using the knowledge of this course.

12. SUGGESTED MICRO-PROJECTS

Only one micro-project is planned to be undertaken by a student that needs to be assigned to him/her in the beginning of the semester. In the first four semesters, the micro-project is group-based (group of 3 to 5). However, **in the fifth and sixth semesters**, the number of students in the group should ***not exceed three.***

The micro-project could be industry application based, internet-based, workshop-based, laboratory-based or field-based. Each micro-project should encompass two or more COs which are in fact, an integration of PrOs, UOs and ADOs. Each student will have to maintain dated work diary consisting of individual contributions in the project work and give a seminar presentation of it before submission. The duration of the micro project should be about **14-16** ***(fourteen to sixteen) student engagement hours*** during the course. The students ought to submit micro-project by the end of the semester to develop the industry-oriented COs.

A suggestive list of micro-projects is given here. This has to match the competency and the COs. Similar micro-projects could be added by the concerned course teacher:

1. Prepare a chart/model of Size reduction equipments along with their Principle and applications.
2. Prepare chart/model for various types of impellers used in Industry.
3. Interpret results of Cumulative Analysis and Differential Analysis using Microsoft excel.
4. Prepare chart for Vortex formation and swirling and Methods for their prevention.
5. Draw suitability chart for various factors for selection of various mechanical equipment.
6. Prepare 15-20 slides power point presentation showing classification, construction and working of any mechanical equipment.
7. Compare Screen Effectiveness by Manual & Mechanical Method using Literature/ experimental data by the use of Microsoft excel.
8. Prepare Laboratory set up for Batch Sedimentation.
9. Prepare Working model of any mechanical operation equipment.
10. Prepare a demonstrative model of any mechanical operation equipment.

13. SUGGESTED LEARNING RESOURCES

GUJARAT TECHNOLOGICAL UNIVERSITY (GTU)

Competency-focused Outcome-based Green Curriculum-2021 (COGC-2021)
Semester-III

Course Title: Fluid Flow Operation
(Code: 4330502)

Diploma Programme in which this course is offered	Semester in which offered
Chemical Engineering	3rd Semester

1. RATIONALE

Knowledge of fluid mechanics is essential for the chemical engineer because the majority of chemical-processing operations are conducted either partly or totally in the fluid phase. This course deals with basic concepts and principles in hydrostatics and hydrodynamics and their application in solving fluid - mechanics problems. Using various theoretical and practical concepts of fluid mechanics, power requirement for pumps, blowers and compressors can be determined and friction losses through pipes and fittings can also be calculated.

2. COMPETENCY

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences:

- To maintain flow of different fluids in the chemical plants according to the process requirement.

3. COURSE OUTCOMES (COs)

The theory, practical experiences and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

1. Calculate the pressure difference using fundamental concept of fluid statics and carry out dimensional analysis.
2. Solve various fluid flow problems using governing equations.
3. Calculate Friction losses from changes in velocity or direction
4. Understand the concept of fluidization.
5. Select the metering equipments and fluid moving machinery for appropriate chemical engineering operations.

4. TEACHING AND EXAMINATION SCHEME

Teaching Scheme (In Hours)			Total Credits (L+T+P)	Examination Scheme				
				Theory Marks		Practical Marks		Total Marks
L	T	P	C	CA	ESE	CA	ESE	
3	-	4	7	30*	70	50	50	200

(*): Out of 30 marks under the theory CA, 10 marks are for assessment of the micro-projectto facilitate the integration of COs, and the remaining 20 marks are the average of 2 tests to be taken during the semester for assessing the attainment of the cognitive domain UOs required for the attainment of the COs.

***Legends: L**-Lecture; **T** – Tutorial/Teacher Guided Theory Practice; **P** - Practical; **C** – Credit, **CA** -Continuous Assessment; **ESE** - End Semester Examination.*

5. SUGGESTED PRACTICAL EXERCISES

The following practical outcomes (PrOs) are the sub-components of the COs. *Some of the **PrOs** marked **'*'** (in approx. Hrs column) are compulsory, as they are crucial for that particular CO at the 'Precision Level' of Dave's Taxonomy related to 'Psychomotor Domain'*.

Sr. No.	**Practical/Exercise** (Course Outcomes in Psychomotor Domain according to NBA Terminology)	Unit No.	Approx. Hrs Required
1.	Estimate pressure drop using U-tube manometer	I	4
2.	Identify types of flow by using Reynolds's apparatus	II	4
3.	Use Bernoulli's apparatus for mechanical energy balance	III	4
4.	Estimate viscosity of water using Hagen-Poiseuille's equation	III	4
5.	Estimate friction losses through pipe, fittings and valves	IV	4
6.	Estimate friction losses through packed bed	IV	4
7.	Conduct a performance test on reciprocating pump and plot the operating characteristics	V	4
8.	Conduct the performance test on centrifugal pump and plot the operating characteristics	V	4
9.	Estimate friction losses due to sudden expansion and contraction in flow area	IV	4
10.	Determine the Co-efficient of discharge for venturi meter	VI	4
11.	Determine the Co-efficient of discharge for orifice meter	VI	4
12.	Determine the Co-efficient of discharge of the Rotameter and obtain the calibration error	VI	4
13.	Determine the Co-efficient of discharge for notches	VI	4
14.	Measure minimum fluidization velocity through fluidized bed	VII	4
		Total	**56**

Note

i. More **Practical Exercises** can be designed and offered by the respective course teacher to develop the industry relevant skills/outcomes to match the COs. The above table is only a suggestive list**.**

ii. The following are some **sample** 'Process' and '#Product' related skills (more may be added/deleted depending on the course) that occur in the above listed **Practical Exercises** of this course required which are embedded in the COs and ultimately the competency.

Sr.No.	Sample Performance Indicators for the PrOs	Weightage in %
1	Handling of apparatus for precise measurements	10
2	Record observations correctly	20
3	Practice and adapt good and safe measuring techniques	10
4	Calculations, Interpretation of results and their conclusion.	20
5	Prepare report of practical in prescribed format	10
6	Solve assignment questions.	20
7	Viva-voce	10
	Total	**100**

6. MAJOR EQUIPMENT/ INSTRUMENTS AND SOFTWARE REQUIRED

These major equipment/instruments and Software required to develop PrOs are given below with broad specifications to facilitate procurement of them by the administrators/management of the institutes. This will ensure the conduction of practice in all institutions across the state in a proper way so that the desired skills are developed instudents.

Sr.No.	Equipment Name with Broad Specifications	PrO. No.
1	**U-tube manometer:-** Metering Tube : Special Uniform bore thick walled Borosilicate Glass Tube, End Connection :Nozzle Type, Mounting : wall panel mounting, Fluid : Mercury, Range : 250-0-250 mm, Accuracy : + 0.5 % of FSD	01
2	**Reynolds's apparatus:**- Test Pipe: Acrylic, 25 mm dia., 800 mm long, Test pipe attached with water tank having capacity of 200 liter, Dye Reservoir : 500 ml	02
3	**Bernoulli's apparatus:**- Testing Duct: MOC-Acrylic , Type : Circular with divergent and convergent sections, Inlet Tank and Outlet Tank: Capacity : 20 lit., MOC : SS – 304 With provision for overflow and valve to stabilize the flow. Pump: MOC : SS body Type : Monoblock Power : 0.5 HP, Single phase Delivery Size : 1/2"	03
4	**Friction loss apparatus:**- Header pipe connected with four pipes, First pipe MS 0.5 inch provided with ball valve, gate valve, globe valve, union joint, Second pipe 0.5 inch without fittings for viscosity determination, Third pipe 02 inch and 0.5 inch connected by sudden expansion and contraction, Forth pipe 01 inch provided with rotameter(Range:3–30 LPH), All pipes and fittings provided with pressure tapping at suitable places. Manometer: Type : U tube, Length : 500 mm, Fluid : Mercury filled up to 200 mm in each limb.	4,5,9,12
5	**Packed bed apparatus:-** Packed Column : Material Borosilicate Glass with both end made of Stainless Steel Dia. 48 mm approx., Height 750 mm approx, Packing Material: glass spherical particles	06

	Size 8-10mm approx, Water tank : Material Stainless Steel, Capacity 30 Ltrs, Water Flow Measurement : By Rotameter, Pressure Drop Measurement: By Manometer, Electricity supply: 1 Phase, 220 V, 50 Hz AC, 5-15 amp combined socket with earth connection.	
6	**Centrifugal pump test rig:-** Pump: Centrifugal Type, 2800 RPM, Drive: Variable speed, Sump Tank : Made of Stainless Steel, Compatible capacity, Measuring Tank : Made of Stainless Steel, Compatible capacity, Stop Watch : Electronic Pressure Gauge : Bourdon type, Range: 0 - 4 kg/ cm^2, Vacuum Gauge : Bourdon type, Range: 0-760 mm of Hg Compound Gauge : Bourdon type, Range: -760 mm of Hg to 2 kg/cm^2, RPM measurement: RPM Indicator with Proximity sensor, Electricity supply: Single Phase, 220 VAC, 50 Hz, 5-15 Amp combined socket with earth connection	07
7	**Reciprocating pump test rig:-** Pressure Gauge:Bourdon type, RPM measurement: Digital RPM Indicator with Proximity sensor., Tanks Material:Stainless Steel, Tank Capacity:40 Liters., Sump Tank Material:Stainless Steel, Sump Tank Capacity:65 Ltrs., Pump Capacity:1 HP, Electricity Supply: Single Phase, 220 V AC, 50 Hz, 5-15amp, Head:5 kg/cm2, Type of Pump : Double Acting cylinder of RPM 320,Piston Stroke : 4cm, Piston Diameter : 4.5cm, Suction pipe : 1", Delivery pipe : 3/4",Pressure gauge : 2 kg/cm2, Vacuum gauge : 0-760mm Hg.	08
8	**Venturi and Orifice meter Apparatus:-** Sump Tank: Capacity : 80 liter MOC : SS – 304 With ½" drain valve, Collection Tank: Capacity : 50 liter, MOC : SS - 304, With self graduated glass tube level indicator & 1" drain valve,Pump: Type : Monoblock MOC : SS – 304 Power : 1 HP, Single Phase,Venturimeter: Size : Suitable for 1" pipeline Dia. Ratio : 0.6-0.64 MOC : Brass With suitable Pressure tapings Arrangement, Orificemeter: Size : Suitable for 1" pipeline Dia. Ratio : 0.6-0.64 MOC : SS 304 With suitable Pressure tapings, Rotameter: Size : Suitable for 1" pipeline Range : 3 – 30 LPH Metering tube: Borosilicate Glass Valve : Needle Valve provided integral, Manometer: MOC : Borosilicate glass tube Size : 500 mm, Fluid : Mercury filled upto 200 mm in each limb, Necessary piping and valves shall be provided to supply water to various flow meters.	10,11
9	**Discharge Over Notches Apparatus:-** Flow Channel: MOC : Rectangular Open Channel of Acrylic, Size : 600 (L) * 250 (W) * 180 (H) mm, Notches: MOC : SS – 304 (Thickness – 1.6 mm), Mounting : Interchangeable, Type: 1.Rectangular, 2. 45°V, Measuring Tank: Capacity : 40 liter, MOC : SS – 304 with self graduated glass tube level indicator, Level gauge: Type : Hook and Screw gauge, Pump: MOC : SS, Type : Monoblock, Power : 0.5 HP, Single Phase	13
10	**Fluidized bed apparatus:-** Material Borosilicate Glass with both end made of Stainless Steel Dia. 48 mm (approx.), Height 750 mm	14

	(approx.) • Packing : Glass Beads • Water tank : Material Stainless Steel, Capacity 30 Ltrs. • Water Circulation : FHP Pump, Crompton/Sharp make. • Water Flow Measurement : By Rotameter • Pressure Drop Measurement : Manometer, Electricity supply: 1 Phase, 220 V AC, 50 Hz, 5-15 amp combined socket with earth connection.	

7. AFFECTIVE DOMAIN OUTCOMES

The following ***sample*** Affective Domain Outcomes (ADOs) are embedded in many of the above-mentioned COs and PrOs. More could be added to fulfill the development of this competency.

a) Work as a leader/a team member.
b) Follow ethical practices
c) Observe safety measures
d) Good house keeping
e) Time management
f) Practice environmentally friendly methods and processes.

The ADOs are best developed through laboratory/field-based exercises. Moreover, the level of achievement of the ADOs according to Krathwohl's 'Affective Domain Taxonomy' should gradually increase as planned below:

i. 'Valuing Level' in 1st year
ii. 'Organization Level' in 2nd year.
iii. 'Characterization Level' in 3rd year.

8. UNDERPINNING THEORY

The major underpinning theory is given below based on the higher level UOs of *Revised Bloom's taxonomy* that are formulated for development of the COs and competency. If required, more such higher-level UOs could be included by the course teacher to focus on the attainment of COs and competency.

Unit	Major Learning Outcomes (Course Outcomes in Cognitive Domainaccording to NBA terminology)	Topics and Sub-topics
Unit – I Fluid Staticsand its Applications	1a. Define Ideal fluid andReal fluid 1b. Differentiate between fluid statics and dynamics	1.1 Ideal fluid and Real fluid 1.2 Fundamentals of fluid statics and dynamics
	1c. Properties of fluid	1.3 Define pressure, Static pressure, Dynamic pressure,Vacuum, Density, Viscosity (Absolute and Kinematic), Specific gravity
	1d. Compare compressible and incompressible fluids	1.4 Compressible and incompressiblefluids

	1e. Derive and apply equation of pressure in static fluid.	1.5 Derivation of equation of pressure in static fluid
	1f. Describe different types of manometers 1g. Derive equation ofpressure difference 1h. Explain differential pressure cell	1.6 Principle construction and workingof: Simple U-tube manometer, Inclined manometer 1.7 Derive equation of pressure difference for U-tube manometer 1.8 Differential pressure cell
	1.i Solve simple numerical	1.9 Numerical based on pressure and manometer
Unit– II Fluid–Flow Phenomena and basic equations of fluid flow	2a. Explain velocity change across cross section	2.1 Velocity field, velocity gradient,shear stress and rate of shear
	2b. Explain effect of solid boundary	2.2 Boundary layer & it's formation In straight tubes
	2c. Compare Newtonian and Non-Newtonian fluids with	2.3 Newtonian and Non-Newtonian fluid
	2d. Describe Reynold'sexperiment	2.4 Reynold's experiment and Reynolds Number
	2e. Solve simple numerical	2.5 Numerical based on Reynolds Number
Unit– III Basic Equations of Fluid Flow	3a. Define velocities	3.1 Average velocity and mass velocity
	3b. Derive continuity equation	3.2 Continuity equation for mass balance in steady flow
	3c. Derive Bernoulli's equation	3.3 Bernoulli's equation and correctionsin Bernoulli's equation

Unit	**Major Learning Outcomes (Course Outcomes in Cognitive Domainaccording to NBA terminology)**	**Topics and Sub-topics**
	3d. Use Hagen-Poiseuille's Equation	3.4 Hagen-Poiseuille's Equation
	3e. Solve simple numerical	3.5 Numerical based on basic equations
Unit–IV Friction in Flowing Fluid	4a. Describe roughness of pipe	4.1 Roughness of pipe
	4b. Explain hydraulic radius and equivalent diameter	4.2 Hydraulic radius and equivalent diameter
	4c. Use friction factor chart	4.3 Friction factor chart
	4d. Explain friction losses	4.4 Friction losses from: (a) Sudden expansion of cross section (b) Sudden contraction of cross section 4.4.1 Friction loss in fittings and valves
Unit– V Transportation of fluid	5a. Compare pipe and tube	5.1 Introduction of pipe and tube 5.2 Birmingham wire gauge(BWG) and schedule no.
	5b. Describe fittings & joints	5.3 Types and uses of fittings and joints

	5c. Select valve for particular application	5.4 Construction and working of valves like: (a) Gate valve (b) Globe valve (c) Check valve (d)Butterfly valve (e) Ball valve (f) Control valve(Air to open and Air to close)
	5d. Classify pumps	5.5 Classification of pumps
	5e. Explain pumps with their startup shut and down procedure	5.6 Construction and working of centrifugal, reciprocating and rotary pump
	5f. Explain characteristics of centrifugal pump	5.7 Explain characteristics of centrifugal pump
	5g. Calculate NPSH, head and power for centrifugal pump	5.8 Developed head and power requirement in centrifugal pump
		5.9 NPSH, and Cavitation in centrifugal pump
		5.10 Numerical based on NPSH, efficiency, head and power
	5h. Explain Fan, Blower, Compressor, Vacuum pump and jet ejectors	5.11 Introduction to Fan, Blowers, Compressors, Vacuum pump and jet ejectors
Unit– VI Flow Measurement	6a. Classify flow measuring devices	6.1 Classification of flow measuring devices
	6b. Describe and select flow meters	6.2 Construction, working principles and application of flow meters like Venturi meter, Orifice meter, Rotameter, weirs, Magnetic flow meter
	6c. Derive equation of flow rate	6.3 Derivation of equation of flow rate through Orifice meter, Venturi meter.

Unit	**Major Learning Outcomes (Course Outcomes in Cognitive Domainaccording to NBA terminology)**	**Topics and Sub-topics**
	6e. Solve simple numerical	6.4 Numerical of Orifice meter, Venturi meter
Unit– VII Fluidization	7a Explain Fluidization	7.1 Fluidization and its industrial applications
	7b Discuss Drag, Drag coefficient, Stokes' law	7.2 Drag and drag coefficient Stokes' law
	7c Explain the condition of fluidization.	7.3 Condition for Fluidization
	7d Define minimum fluidization velocity	7.4 Minimum fluidization velocity

9. SUGGESTED SPECIFICATION TABLE FOR QUESTION PAPER DESIGN

			Distribution of Theory Marks

Unit	Unit Title	Teaching Hours	R Level	U Level	A Level	Total Marks
I	Fluid Statics and itsApplications	06	02	03	04	09
II	Fluid–Flow Phenomena	05	02	03	02	07
III	Basic Equations of Fluid Flow	06	02	06	02	10
IV	Friction in Flowing Fluid	04	02	02	02	06
V	Transportation of Fluid	10	05	08	05	18
VI	Flow Measurement	08	04	07	04	15
VII	Fluidization	03	01	02	02	05
	Total	**42**	**18**	**31**	**21**	**70**

Legends: *R=Remember, U=Understand, A=Apply and above (Revised Bloom's taxonomy)*

Note*: This specification table provides general guidelines to assist students for their learning and to teachers to teach and question paper designers/setters to formulate test items/questionsto assess the attainment of the UOs. The actual distribution of marks at different taxonomy levels (of R, U and A) in the question paper may slightly vary from above table.*

10. SUGGESTED STUDENT ACTIVITIES

Other than the classroom and laboratory learning, the following are the suggested student- related ***co-curricular*** activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should perform the following activities in groupand prepare small reports of about 5 pages for each activity. They should also collect/record physical evidence such as photographs/videos of the activities for their (student's) portfolio which will be useful for their placement interviews:

a) Make a survey on types of valves and pumps we use domestically.
b) Prepare a report on fluid flow through open channel in your city/village.
c) Draw and report water distribution system of chemical engineering department building.
d) Make a chart/poster on Mechanical seal and stuffing box.
e) Determine the energy consumption and efficiency of existing pumps of laboratory.
f) Collect different parts of various pumps from scrap yard.

11. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:

a) Massive open online courses (*MOOCs*) may be used to teach various topics/subtopics.
b) Guide student(s) in undertaking micro-projects/activities.
c) Different types of teaching methods i.e. video demonstration, activity based learning,

case study, m-learning need to be employed by teachers to develop the outcomes.

d) Some *of the topics/sub-topics* which are relatively simpler or descriptive are to be given to the students for *self-learning* but to be assessed using different assessment methods.
e) Teachers need to ensure to create opportunities and provisions for *co-curricular activities*.
f) Guide students to address issues on environment and sustainability with reference to using the knowledge of this course
g) OERs, Vlab, and Olabs may be used to teach for the teaching of different concepts.

12. SUGGESTED MICRO-PROJECTS

Only one micro-project is planned to be undertaken by a student that needs to be assigned to him/her at the beginning of the semester. In the first four semesters, the micro-project are group-based (group of 3 to 5). However, **in the fifth and sixth semesters**, the number of students in the group should ***not exceed three.***

The micro-project could be industry application-based, internet-based, workshop- based, laboratory-based, or field-based. Each micro-project should encompass two or more COs which are the integration of PrOs, UOs, and ADOs. Each student will have to maintain a dated work diary consisting of individual contributions in the project work and give a seminar presentation of it before submission. The duration of the microproject should be about **14-16** ***(fourteen to sixteen) student engagement hours*** during the course.The students ought to submit micro-project by the end of the semester (so that they develop industry- oriented COs.

A suggestive list of micro-projects is given here. This should relate highly to the competency of the course and the COs. Similar micro-projects could be added by the concerned course teacher.

a) Prepare a model to demonstrate flow through open channels.
b) Prepare a chart on different types of vacuum pumps.
c) Prepare a chart on various types of manometers.
d) Prepare a power point presentation on classification and demonstration of valves.
e) Develop a friction factor chart experimentally.
f) Prepare a model/chart/poster on pneumatic and hydraulic conveying.
g) Prepare a chart that classifies fluid on various bases.
h) Prepare a power point presentation on blowers and compressors.
i) Prepare a power point presentation on classification and demonstration of flow measuring devices.
j) Prepare a power point presentation on various methods to join pipes and tubes.
k) Make a report on Cavitation, its identification and prevention.
l) Prepare a power point presentation pertaining to friction loss in fittings and valves.
m) Make a chart on selection criteria of pumps and valves.

GUJARAT TECHNOLOGICAL UNIVERSITY (GTU)

Competency-focused Outcome-based Green Curriculum-2021 (COGC-2021)
Semester-III

Course Title: Process Calculation
(Course Code: 4330503)

Diploma programmer in which this course is offered	Semester in which offered
Chemical Engineering	Third

1. RATIONALE

Process calculation provides the fundamental information to determine the material and energy balances for all types of unit operations and unit processes across the equipment and overall chemical plant. Material and energy balance calculations are of prime importance for design and also for conservation of mass and energy to reduce the losses and cost that enhances overall economy of plant. The unit conversions, material and energy balance are the essential part in the practice of other courses such as mechanical operations, fluid flow, heat Transfer, mass transfer etc. Thus this course is a core course for chemical engineers and should be learned sincerely by students.

2. COMPETENCY

The purpose of this course is to help the student to attain the following industry identified competency through various teaching learning experiences:

- **Determine material and energy balance for different unit operations and processes**

3. COURSE OUTCOMES (COs)

The practical exercises, the underpinning knowledge and the relevant soft skills associated with the identified competency are to be developed in the student for theachievement of the following COs:

a) Apply stoichiometric principles for solving chemical engineering problems.
b) Calculate material balance for chemical process.
c) Calculate energy balance for chemical process.
d) Estimate amount of fuel and amount of air required for combustion process.

4. TEACHING AND EXAMINATION SCHEME

Teaching Scheme (In Hours)			Total Credits (L+T+P/2)	Examination Scheme				
				Theory Marks		Practical Marks		Total Marks
L	T	P	C	CA	ESE	CA	ESE	
4	0	0	4	30	70	0	0	100

(*): Out of 30 marks under the theory CA, 10 marks are for assessment of the micro-project to facilitate integration of COs and the remaining 20 marks is the average of 2 tests to be taken during the semester for the assessing the attainment of the cognitive domain UOs required for the attainment of the COs.

***Legends: CI**-Class Room Instructions; **T** – Tutorial/Teacher Guided Theory Practice; **P** - Practical; **C** – Credit, **CA** - Continuous Assessment; **ESE** - End Semester Examination..*
***Legends: L**-Lecture; **T –** Tutorial/Teacher Guided Theory Practice; **P** -Practical; **C –** Credit, **CA** - Continuous Assessment; **ESE** -End Semester Examination.*

5. SUGGESTED PRACTICAL EXERCISES

Following practical outcomes (PrOs) are thesub-components of the Course Outcomes (Cos). Some of the **PrOs** marked **'*'** are compulsory, as they are crucial for that particular CO at the 'Precision Level' of Dave's Taxonomy related to 'Psychomotor Domain'.

Sr. No.	Practical Outcomes (PrOs)	Unit No.	Approx. Hrs. Required
	Not Applicable		

Note
*i.More **Practical Exercises** can be designed and offered by the respective course teacher to develop the industry relevant skills/outcomes to match the COs. The above table is only a suggestive list.*
*ii. The following are some **sample** 'Process' and 'Product' related skills (more may be added/deleted depending on the course) that occur in the above listed **Practical Exercises** of this course required which are embedded in the COs and ultimately the competency*

The following are some **sample** 'Process' and 'Product' related skills (more may be added/deleted depending on the course) that occur in the above listed **Practical Exercises** of this course required which are embedded in the COs and ultimately the competency.

Sr. No.	Sample Performance Indicators for the PrOs	Weightage in %
1	Question answer or Writing steps exercise	30
2	Executing of exercise	30
3	Result	40
		100

6. MAJOR EQUIPMENT/ INSTRUMENTS REQUIRED

This major equipment with broad specificationsfor the PrOsis a guide to procure them by the administrators to user in uniformity of practical's in all institutions across the state.

Sr. No.	Equipment Name with Broad Specifications	PrO. No.
1.	Not Applicable	

7. AFFECTIVE DOMAIN OUTCOMES

The following ***sample***Affective Domain Outcomes (ADOs) are embedded in many of the above-mentioned COs andPrOs.More could be added to fulfill the development of this course competency.

a) Work as a leader/a team member.

b) Follow ethical practices
c) Practice environmentally friendly methods and processes (environmental related).

The ADOs are best developed through the laboratory/field based exercises. Moreover, the level of achievement of the ADOs according to Krathwohl's 'Affective Domain Taxonomy' should gradually increase as planned below:

i. 'Valuing Level' in 1st year
ii. 'Organization Level' in 2nd year.
iii. 'Characterization Level' in 3rd year.

8. UNDERPINNING THEORY

The major underpinning theory is given below based on the higher level UOs of *Revised Bloom's taxonomy* that are formulated for development of the COs and competency. If required, more such UOs could be included by the course teacher to focus on attainment of COs and competency.

Unit	Unit Outcomes (UOs) (4 to 6 UOs at different levels)	Topics and Sub-topics
Unit-I **Unit Systems**	1a. Explain the importance of process calculation. 1b. Define different unit systems. 1c. Explain the importance of physical quantities of Units. 1d. Convert units among different systems.	1.1 Introduction to process calculation 1.2 Dimensions and systems of units 1.3 Fundamental quantities of units, Derived quantities 1.4 Definition and units of force, volume, pressure, work, energy, power, heat 1.5 Unit conversions in FPS, MKS and SI systems
Unit– II **Basic Chemical Calculations**	2a. Calculate important physical quantities. 2b. Calculate composition of mixtures and solutions.	2.1 Definition and calculations of mole, atomic weight, molecular weight, equivalent weight, specific gravity and API gravity 2.2 Expression of composition of mixtures and solutions 2.3 Morality, Normality, Morality, gm/lit and related simple numerical
Unit-III **Ideal Gas Law**	3a. Derive ideal gas law. 3b. State reference conditions. 3c. Calculate important quantities for ideal gas mixture.	3.1 Concept of ideal gas 3.2 Derivation of ideal gas law 3.3 STP and NTP conditions 3.4 Dalton's law, Amagat's law,Raoult's Law and Henry's Law 3.5 Relation between mole%, volume% and pressure% of ideal gases 3.6 Calculation of average molecular weight, density, mole%, weight% in gas mixture in SI/MKS systems
Unit– IV	4a. Explain law of conservation of mass.	4.1 Law of conversation of mass 4.2 Brief description and simple

Unit	Unit Outcomes (UOs) (4 to 6 UOs at different levels)	Topics and Sub-topics
Material Balance In Processes Without Chemical Reactions	4b. Calculate mass balance of important unit operations at steady state condition. 4c. Describe purging, recycling and bypassing operations.	material balance calculation of drying, distillation, absorption, mixing, crystallization, evaporation 4.3 Single stage material balance calculation of leaching and extraction 4.4 Brief idea regarding recycling, purging and by passing operation
Unit– V **Material Balance In Processes Involving Chemical Reactions**	5a. Explain basic concepts of material balance with chemical reaction. 5b. Calculate mass balance with chemical reaction.	5.1 Definition: Limiting reactant, Excess reactant, conversion, yield and selectivity 5.2 Simple numerical for finding yield, conversion and composition 5.3 Simple calculation of material Balance based on reaction.
Unit– VI **Energy Balance**	6a. Calculate heat capacity, specific heat, heat capacity of gas mixture and liquid mixture. 6b. Explain concepts of sensible heat and latent heat. 6c. Calculate standard heat of formation and heat of reaction.	6.1 Heat capacity and specific heat 6.2 Mean heat capacity of gases 6.3 Heat capacity of gas mixture and liquid mixture 6.4 Calculations of heat capacity by integral equation up to three terms 6.5 Brief explanation of sensible and latent heat of fusion, sublimation, vaporization 6.6 Calculations of standard heat of formation from heat of combustion data 6.7 Calculations for heat of reaction from heat of formation and heat of combustion data 6.8 Hess's Law and calculations
Unit– VII **Combustion**	7a. Describe combustion. 7b. Describe calorific value. 7c. Calculate calorific value and air requirement for combustion.	7.1 Introduction of combustion 7.2 Types of fuels 7.3 Calorific values of fuels 7.4 Proximate and ultimate analysis of solid fuel 7.5 Numerical related to calorific values of fuel from composition 7.6 Numerical related to air Requirement and composition of flue gases.

9. SUGGESTED SPECIFICATION TABLE FOR QUESTIONPAPER DESIGN

Unit No.	Unit Title	Teaching Hours	Distribution of Theory Marks			
			R Level	U Level	A Level	Total Marks

1	**Unit Systems**	**4**	**2**	**2**	**2**	**06**

TOTAL		**56**	**12**	**21**	**37**	**70**

Legends: *R=Remember, U=Understand, A=Apply and above (Revised Bloom's taxonomy)*

10. SUGGESTED STUDENT ACTIVITIES

Other than the classroom and laboratory learning, following are the suggested student-related ***co-curricular*** activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should perform following activities in group and prepare reports of about 5 pages for each activity. They should also collect/record physical evidences for their (student's) portfolio which may be useful for their placement interviews:

a) Group assignments based on mass and energy balance of equipments like heat exchanger, boilers, distillation column, evaporator, dryer, reactors, absorption column.
b) Use of MS-Excel in solving numerical.
c) Draw block diagram and write down overall and component material balance for various mass transfer operation and mechanical operations.

11. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:

a) Massive open online courses (***MOOCs***) may be used to teach various topics/sub topics.
b) Guide student(s) in undertaking micro-projects.
c) ***'L' in section No. 4***means different types of teaching methods that are to be employed by teachers to develop the outcomes.
d) About ***20% of the topics/sub-topics*** which are relatively simpler or descriptive in nature is to be given to the students for ***self-learning***, but to be assessedusing different assessment methods.
e) With respect to ***section No.10***, teachers need to ensure to create opportunities and provisions for ***co-curricular activities***.
f) Guide students for reading data sheets.

12. SUGGESTED MICRO-PROJECTS

Only one micro-project is planned to be undertaken by a student that needs to be assigned to him/her in the beginning of the semester. In the first four semesters, the micro-projects

are group-based (group of 3 to 5). However, **in the fifth and sixth semesters**, the number of students in the group should ***not exceed three.***

The micro-project could be industry application based, internet-based, workshop-based, laboratory-based or field-based. Each micro-project should encompass two or more COs which are in fact, an integration of PrOs, UOs and ADOs. Each student will have to maintain dated work diary consisting of individual contribution in the project work and give a seminar presentation of it before submission. The duration of the micro project should be about **14-16** ***(fourteen to sixteen) student engagement hours*** during the course. The students ought to submit micro-project by the end of the semester to develop the industry-oriented COs.

A suggestive list of micro-projects is given here. This has to match the competency and the COs. Similar micro-projects could be added by the concerned course teacher:

a) Give a data of different unit operation and calculate material balance.
b) Give a data of different unit operation and calculate energy balance.
c) Prepare chart on molecular weight and equivalent weight.
d) Visit of chemical process plant: Prepare block diagram showing material balance for process equipment used in plant which you have visited.

13. SUGGESTED LEARNING RESOURCES

Sr. No.	Title of Book	Author	Publication with place, year and ISBN

GUJARAT TECHNOLOGICAL UNIVERSITY(GTU)

Competency-focused Outcome-based Green Curriculum-2021 (COGC-2021)
Semester-III

CourseTitle: Chemical Process Technology
(Course Code: 4330504)

Diploma programme in which this course is offered	Semester in which offered
Chemical Engineering	Third

1. RATIONALE

The importance of this subject arises from the need of providing comprehensive and balanced understanding of essential link between chemistry and the chemical industry. It is vital to develop simple but meaningful flow diagram for each chemical product which a student can understand. This course develops skill for arranging and understanding treatment, reaction and separation steps in a flow diagram for variety of chemicals including acids, chloro-alkalis, fuels and industrial gases, cement, lime, polymer, dyes and intermediates, pharmaceutical, fermentation, pesticides, Soap and detergents, fertilizerand many other products. Diploma holders utilize this skill to read and recognize each steps of process flow diagrams during their job. The area of job may be production, R and D, design, technical services, project development, sales and marketing etc.

2. COMPETENCY

The course content should be taught and implemented with the aim to develop different types of skills leading to the achievement of the following competencies:

- Synthesize reactions and unit operations steps to develop and operate a chemical plant to manufacture important chemicals.

3. COURSEOUTCOMES(COs)

The practical exercises, the underpinning knowledge, and the relevant soft skills associated with this competency are to be developed in the student to display the following COs:

At the end of the course, a student will be able to

1) Explain the classification and properties of various chemicals
2) Apply concept of the manufacturing processes of various chemicals with neat sketch to operate chemical plant.
3) Identify major engineering problems encountered in manufacturing processes.
4) Suggest applications of various chemicals.

4. TEACHING AND EXAMINATION SCHEME

TeachingScheme (InHours)			Total Credits (L+T+P/2)	Examination Scheme				
				Theory Marks		Practical Marks		Total Marks
L	T	P	C	CA	ESE	CA	ESE

Total		**100**

6. MAJOR EQUIPMENT/INSTRUMENTS AND SOFTWARE REQUIRED

These major equipment/instruments and Software required to develop PrOs are given below with broad specifications to facilitate procuremen to them by the administrators/management of the institutes.This will ensure the conduction of practice in All institutions across the state in a proper way so that the desired skills are developed in students.

Sr. No.	EquipmentNamewithBroadSpecifications	PrO.No.
1	**HotAirOven:** Temperature is controlled by digital temperature indicator cumcontroller from ambient to 250°C with ± 0.1°C Accuracy. Powersupply: 220/230V, 50Hz single phase, Capacity (Approx.): 50 – 100 liter, Type of Shelves: 03, Material of Inner Chambers: SS304, Material of Outer Chamber: MS with powder coated paint,MaterialofShelves:SS wire mesh.	All
2	**LaboratoryWeighingBalance:** Type of Laboratory Balance: Analytical, Sensitivity (mg): 1 mg,Maximum Capacity of weighing (grams): 200 g, Shape of PAN:Circular, PowerSupply: Single Phase,Display: LED.	All
3	**HotPlateWithMagneticStirrer:** NumberofstirringPositions:1,Calibration:AutomaticCalibration,Magnetic stirrer with a hot plate, Speed Control Accuracy of setspeed (+/-) (RPM): 5, Maximum Stirring capacity per position:3000ml,TopplateMaterial:Stainlesssteel	All
4	**Lab cooling bath**: 220V/50HZ, 1.5KW, 370*340*480mm	All
5	**Bomb calorimeter** Model CC01/M3,, Iso-Thermal, BS 1016: Part 5:1967 IS: 1359–1959 IP 12/63T	12
6	**Grinder**: 230V 50Hz, 950 W, 11000 rpm, 1.8 K	07
7	**Oil making machine :** 3-6 Kg/Hr, 600 W, Gear Box, 400x160x360mm	07
8	**Hand blender: 200w**	09
9	**Crucible and designator :** white ceramic melting crucible , Dish cup 55mm for high temperature refining,	11
10	**Furnace :** Digital Muffle Furnace, 220-230V, 900°C, 25x125x250mm	11

11	**Fermentator:** 22 x 40 x 38 cm (W x D x H), LDC 4 x 40 digits with backlight, Pyrex glass with 5 to 8 side necks (culture volumes from 35 ml to 6 l)	11

7. AFFECTIVE DOMAIN OUTCOMES

The following ***sample*** Affective Domain Outcomes (ADOs) are embedded in many of theabove-mentioned COs and PrOs. More could be added to fulfill the development of thiscompetency.

a) Work as a leader
b) Follow ethical practices
c) Observe safety measures
d) Good house keeping
e) Time management
f) Practice environmentally friendly methods and
g) processes.(Environment-related)

The ADOs are best developed through laboratory/field-based exercises.Moreover,the levelof achievement of the ADOs according to Krathwohl's 'Affective Domain Taxonomy' should gradually increaseas planned below:

i. 'ValuingLevel'in1st year
ii. 'Organization Level'in2nd year.
iii. 'Characterization Level'in3rd year.

8. UNDERPINNINGTHEORY

The major underpinning theory is given below based on the higher level UOs of *Revised Bloom'staxonomy* that are formulated for development of theCOs and competency.If required, more such higher-level UOs could be included by the course teacher to focus on the attainment of COs and competency.

Unit	Unit Outcomes (UOs)	Topics and Sub-topics
Unit – I Inorganic Chemical Industries	1a. Classify Various Chemical Industries 1b. Describe Properties & Uses of Chemicals 1c. Prepare Flow Diagram and Explain Manufacturing Process 1d. Explain Major Engineering Problems	1.1 Classification of Chemical Industries 1.2 Physical Properties, Application, Manufacturing Process and Major Engineering Problem of 1.2.1 Sulphuric acid 1.2.2 Soda ash 1.2.3 Caustic soda 1.2.4 Cement 1.2.5 Lime 1.2.6 Urea 1.2.7 Elemental phosphorus 1.2.8 Potassium Chloride
Unit-II Polymer Industries	2a. Classify Polymer 2b. Explain application & uses of polymer 2c. Prepare Flow Diagram and Explain Manufacturing Process	2.1 Classification of Polymer 2.2 Explain Physical Properties, Application & Manufacturing Process of 2.2.1 Polyethylene 2.2.2 Styrene butadiene rubber

		2.2.3 Phenol formaldehyde
Unit -III Natural Product Industries	3a. Define fat and oil, carbohydrates, pulp & paper 3b. Describe physical properties of oil & fat 3c. Describe fermentation types 3d. Prepare Flow Diagram and Explain Manufacturing Process 3e. Explain Major Engineering Problems 3f. Explain Role of Biotechnology	3.1 Definition and Physical Properties of Fat & Oil 3.2 Manufacturing Process of Vegetable oil 3.3 Basics of Carbohydrates 3.5 Manufacturing Process of Sugar with Major Engineering Problem 3.6 Basics of Soap & Detergent 3.7 Manufacturing Process of 3.7.1 Soap 3.7.2 Detergent Powder 3.8 Definition of Pulp & Paper 3.9 Manufacturing Process of Pulp by Kraft Process with Major Engineering Problem 3.10 Manufacturing Process of Paper by Wet Process with Major Engineering Problem 3.11 Types of Fermentation 3.12 Manufacturing Process of Ethanol with Major Engineering Problem 3.13 Role of Biotechnology in Chemical Engineering
Unit –IV Fuel and Industrial Gases	4a. Classify, describe and uses of fuels 4b. Classify Coal 4c. Prepare Flow Diagram and Explain Manufacturing Process 4d. Explain Major Engineering Problems 4e. Describe Explosive and propellant 4f. Explain important of cryogenic technology in chemical engineering	4.1 Fuels: types, sources, uses 4.2 Classification of Coal 4.3 Important industrial gases 4.4 Manufacturing and major engineering problem of 4.4.1 Producer gas 4.4.2 Coke oven gas 4.5 Classify Explosive and propellant 4.6 Important of cryogenic technology in chemical engineering
Unit –V Synthetic Organic Chemical Industries	5a. Classify Pharmaceutical Drugs, Pesticides and Dyes 5b. Explain pesticides formulation 5c. Prepare Flow Diagram and Explain Manufacturing Process 5d. Explain Major Engineering Problems	5.1 Classification of pharmaceutical Drugs based on Their Uses with Examples 5.2 Manufacturing Process and Major Engineering Problem of 5.2.1 Penicilline 5.2.2 Aspirin 5.3 Classify pesticides 5.4 Pesticide formulation 5.5 Manufacturing Process and Major Engineering Problem of 5.5.1 Parathion 5.5.2 2-4 Dichlorophenoxy acetic acid

		5.6 Classification of Dyes 5.7 Manufacturing Process of Nitrobenzene 5.8 Manufacturing Process of Aniline by Reduction of Nitrobenzene

9. SUGGESTEDSPECIFICATIONTABLEFORQUESTIONPAPERDESIGN

UnitNo.	UnitTitle	TeachingHours	Distribution of TheoryMarks			
			R Level	U Level	A Level	TotalMarks

V	Synthetic Organic Chemical Industries	09	03	06	06	15
Total		**42**	**17**	**30**	**23**	**70**

Legends:*R=Remember,U=Understand,A=Apply and above(Revised Bloom'staxonomy)*

Note*: This specification table provides general guidelines to assist students for their learning and to teachers to teach and question paper designers/setters to formulate test items/questionsto assess the attainment of the UOs. The actual distribution of marks at different taxonomy levels(of R, Uand A)in the question paper may slightly vary from above table.*

10. SUGGESTED STUDENT ACTIVITIES

Other than the classroom and laboratory learning, the following are the suggested student-related ***co-curricular*** activities which can be undertaken to accelerate the attainment of the various out comes in this course: Students should perform the following activities in group and prepare small reports of about 5 pages for each activity. They should also collect/record physical evidence such as photographs/videos of the activities for their (student's) portfolio which will be useful fortheir placement interviews:

a) Prepare a PowerPoint presentation or animation showing different types of chemical manufacturing Process
b) Prepare a model of different chemical product flow diagram
c) Preparation of a table showing the difference between Organic and Inorganic Compounds.
d) Market survey of different Chemical product and compare their physical and chemical properties.
e) Library survey regarding polymers and fertilizers in different industries.
f) Collect different polymers and prepare the chart/ PowerPoint based on their type,properties, and uses.

11. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES(ifany)

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:

a) Massive open online courses (*MOOCs*) may be used to teach various topics/subtopics.
b) Guide student(s)inundertakingmicro-projects/activities.
c) Different types of teaching methods i.e. video demonstration, activity based learning,casestudy, m-learning need to be employed byteachers to develop the outcomes.
d) Some *of the topics/sub-topics* which are relatively simpler or descriptive are to begiven to the students for *self-learning* but to be assessed using different assessment methods.
e) Teachers need to ensure to create opportunities and provisions for*co-curricular activities*.
f) Guide students to address issues on environment and sustainability with reference to using the knowledge of this course
g) OERs, Vlab, and Olabs may be used to teach for the teaching of different concepts.

12. SUGGESTEDMICRO-PROJECTS

Only one micro-project is planned to be undertaken by a student that needs to be assigned to him/heart the beginning of the semester.In the first four semesters,themicro-projectare group-based (group of 3 to 5). However, **in the fifth and sixth semesters**, the number of students in the group should ***not exceed three.***

Themicro-projectcould beindustry application-based, internet-based, workshop-based, laboratory-based, or field-based. Each micro-project should encompass two or moreCOs which are the integration of PrOs, UOs, and ADOs. Each student will have to maintain a dated work diary consisting of individual contributions in the project work and give a seminar presentation of it before submission. The duration of the microproject should be about **14-16** ***(fourteen to sixteen) student engagement hours*** during the course.The student sought to submit micro-project by the end of the semester (so that they develop industry-orientedCOs.

A suggestive listofmicro-projects is givenhere. This should relate highly to the competency of the course and theCOs.Similar micro-projects could be added by the concerned course teacher:

a) Prepare a chart of the properties of given product
b) Prepare a chart to demonstrate manufacturing process.
c) Prepare a report on major engineering problem of given manufacturing process
d) Prepare a chart of application of given products
e) Prepare a power pont presentation on a topic “List of chemicals manufacturing industries in India”
f) Prepare a PowerPoint presentation or animation showing different types of chemical manufacturing Process

GUJARAT TECHNOLOGICAL UNIVERSITY (GTU)

Competency-focused Outcome-based Green Curriculum-2021 (COGC-2021)
Semester-V

Course Title: Entrepreneurship & Start-ups
(Course Code: 4300021)

Diploma programmer in which this course is offered	Semester in which offered
All Branches of Diploma Engineering	5th Semester

1. RATIONALE

Entrepreneurs have significant impact on our country's current developing economy. The social expectations towards engineering professionals are certainly emerging as job creators especially with the thrust given to "Make in India" and "Vocal for Local" campaigns. Startup India is a well-known flagship initiative of the Government of India, intended to catalyze startup culture and build a strong and inclusive ecosystem for innovation and entrepreneurship. The last 6 years have witnessed tremendous growth of start-ups i.e. from 733 in 2016-17 to 14000 in 2021-22. This course focuses on the basic roles, skills and functions of entrepreneurship with special attention to startup. The course is directed to help students to enhance capabilities in the field of managing the given task as well as to understand peripheral influencing aspects for starting a new business. It will certainly help students to think in a direction to establish a small industry /start-up and develop /validate it using fundamental know how.

2. COMPETENCY

The purpose of this course is to help the student to attain the following industry identified competency through various teaching learning experiences:

- **Establish a small enterprise /start-up validate it and make it scalable.**

3. COURSE OUTCOMES (COs)

The practical exercises, the underpinning knowledge and the relevant soft skills associated with the identified competency are to be developed in the student for the achievement of the following COs:

Upon completion of the course, the student will be able to demonstrate knowledge of the following topics:

1) Understanding the dynamic role of entrepreneurship and Startups by Acquiring Entrepreneurial spirit and resourcefulness, quality, competency, and motivation
2) Identify a Business Idea and implement it
3) Select suitable Management practices like leadership and Ownership, resource institutes
4) Overview of Support Agencies and Incubators
5) Building Project Proposal & knowing CSR , Ethics, Ex-Im, & Exit strategies

4. TEACHING AND EXAMINATION SCHEME

Teaching Scheme (In Hours)	Total Credits (L+T+P/2)	Examination Scheme		
		Theory Marks	Practical	Total Marks

						Marks		
L	**T**	**P**	**C**	**CA**	**ESE**	**CA**	**ESE**	
3	0	0	3	30*	70	0	0	100

(*): Out of 30 marks under the theory CA, 10 marks are for assessment of the micro-project to facilitate integration of COs and the remaining 20 marks is the average of 2 tests to be taken during the semester for the assessing the attainment of the cognitive domain UOs required for the attainment of the COs.

***Legends: L**-Lecture; **T** – Tutorial/Teacher Guided Theory Practice; **P** - Practical; **C** – Credit, **CA** - Continuous Assessment; **ESE** - End Semester Examination.*

5. SUGGESTED Soft PRACTICAL EXERCISES (During Theory)

The entrepreneurial or start-up journey begins by readying for your future dream from college projects and pursuing the same beyond college hours also. It is encouraged to go through COs and identify traits and search for various state and national agencies for your entrepreneurship / start-up journey and convert the same into successful product in market.

The following practical outcomes (SPrOs) are the sub-components of the Course Outcomes (COs). Some of the **SPrOs** marked **'*'** are compulsory, as they are crucial for that particular CO at the 'Precision Level' of Dave's Taxonomy related to 'Psychomotor Domain'.

Note

i. *Though the course does not contain any Practical work, a few **Practical Exercises** can be designed and offered by the respective course teacher to develop the industry relevant skills/outcomes to match the COs. The below table is only a suggestive list.*

ii. *The following are some **sample** 'Process' and 'Product' related skills (more may be added/deleted depending on the course) that occur in the above listed **Practical Exercises** of this course required which are embedded in the COs and ultimately the competency.*

Sr. No.	Sample Performance Indicators for the PrOs	Weightage in %
1	Entrepreneur Traits and Behavior Modelling	30
2	Various State and Central Entrepreneurship Promotional Schemes and Start-up Policies	30
3	Business Model for a Startup and study of Unicorns*	40
Total		**100**

6. AFFECTIVE DOMAIN OUTCOMES

The following ***sample*** Affective Domain Outcomes (ADOs) are embedded in many of the above-mentioned COs and PrOs. More could be added to fulfill the development of this course competency.

a. Work as a leader/a team member (while doing a micro-project).
b. Model behavioral practices of an entrepreneur while planning for an enterprise
c. Practice ethics and consider methods/ processes that reduce waste and/or possibly conserve environment in designing a new business till it's commercialization.

The ADOs are best developed through the laboratory/field-based exercises. Moreover, the level of achievement of the ADOs according to Krathwohl's 'Affective Domain Taxonomy' should gradually increase as planned below:

i. 'Valuing Level' in 1st year-Planning
ii. 'Organization Level' in 2nd year-Model Development
iii. 'Characterization Level' in 3rd year-Make it Scalable

7. UNDERPINNING THEORY

The major underpinning theory is given below based on the higher level UOs of *Revised Bloom's taxonomy* that are formulated for development of the COs and competency. If required, more such UOs could be included by the course teacher to focus on attainment of COs and competency.

Unit	Major LearningOutcomes (in cognitive domain)	Topics and Sub-topics
1) Introduction to Entrepreneurship and Start – Ups	1a) Define Entrepreneurship 1b) Discuss characteristics and functions of entrepreneurship. 1c) Identify different types of Entrepreneurships 1d) Compare the concepts entrepreneurand intrapreneur and find out the motivation behind it 1e) Distinguish between entrepreneur and managers 1f) Identify 7-M Resources 1g) Know MSME & Startup India, standup India, SSIP and its registration process for both.	1. Definition, Traits of an entrepreneur, 2. Functions of Entrepreneurship - Job Creation, Innovation, Inspiration, Economic Development 3. Types of Entrepreneurship 4. Motivation for Intrapreneurship 5. Types of Business Structures, 6. Similarities and differences between entrepreneurs and managers. 7. 7-M Resources 8. Micro, Small, Medium Enterprise/ MSME - Industry Registration Process 9. Startup India, Standup India and SSIP Gujarat & Startup registration process

2) Business Ideas and their implement ation (Idea to Start-up)	2a) Finding Ideas and making an activity map 2b) Develop the plans forcreating and starting the business 2c) To identify business using the ideation canvas and the business model canvas 2d) To know market research related terms 2e) To know market mix related terms 2f) Learn Product related terminologies 2g) Emphasize on Innovation 2h) Explain concept of Risk and SWOT	1. Discovering ideas and visualizing the business with Activity map 1.1 Idea Generation 1.2 Product Identification 2. Business Plan- The Marketing Plan and Financial Plan/ Sources of Capital 3. Business opportunity identification and evaluation 4. Market research 4.1.1. Questionnaire design 4.1.2. Sampling 4.1.3. Market survey 4.1.4. Data analysis & interpretation 5. Marketing Mix (4Ps- product,price, promotion place) 5.1.1. Identifying the target market 5.1.2. Competition evaluation and Strategy adoption 5.1.3. Market Segmentation 5.1.4. Marketing, Advertising and Branding 5.1.5. Digital Marketing 5.1.6. B2B, E-commerce and GeM 6. Product Terms- PLC, Mortality Curve and New product Development Steps, Inventory, Supply Chain Management 7. Importance and concept of Innovation, Sources and Process 8. Risk analysis and mitigation by SWOT Analysis
3) Management Practices	3a) Explain the concept and differences between industry, commerce and business. 3b) Describe various types of ownerships in the organization. 3c) Explain different types of leadership models. 3d) Analyze the nature and importance of various functions of management 3e) Discuss Financial organization Management 3f) Distinguish management and administration	1. Industry, Commerce and Business 2. Types of ownership in the organization -Definition, Characteristics, Merits &Demerits 3. Different Leadership Models 4. Functions of Management- Merits & Demerits 4.1 Planning 4.2 Company's Organization Structure 4.3 Directing 4.4 Controlling 4.5 Staffing- Recruitment and management of talent. 5. Financial organization and management 6. Differences between Management and Administration

4) Support Agencies and Incubators	4a) Identify support agencies and current promotional schemes for enterprise and startups 4b) Advocacy to investor 4c) To Explain various Legal Issues	1. State & National Level Support agencies and Current Promotional Schemes for new Enterprise 2. Start-up Incubation and modalities 3. Communication of Ideas to potential investors – Investor Pitch 4. Legal Issues 4.1. Contracts 4.2. Copyrights 4.3. Insurance 4.4. IPR 4.5. Licensing 4.6. Patents 4.7. Trade Secrets 4.8. Trademarks
5) Project Proposal & Exit strategies	5a) To work on the development of a project proposal 5b) Describe social responsibility and relate with economic Performance. 5c) Explain managerialethics 5d) To know Ex-Im Policies 5e) Identify suitable strategies of succession and harvesting	1. Project Planning i. Project planning and report ii. Feasibility study iii. Project cost estimation iv. Breakeven point, v. Return on investment and Return on sales 2. Corporate Social Responsibilities and Economic performance 3. Business Ethics 4. Ex-Im policies 5. Succession and harvesting strategy 6. Bankruptcy and avoidance

8. SUGGESTED SPECIFICATION TABLE FOR QUESTIONPAPER DESIGN

Unit No.	Unit Title	Teaching Hours	Distribution of Theory Marks			
			R Level	U Level	A Level	Total Marks
I	Introduction to Entrepreneurship and Start – Ups	08	4	6	2	12
II	Business Ideas and their implementation (Idea to Startup)	08	6	4	4	14
III	Management Practices	12	6	8	8	22
IV	Support Agencies and	08	4	4	4	12

	Incubators					
V	Project Proposal & Exit strategies	06	2	4	4	10
Total		**42**	**22**	**26**	**22**	**70**

Legends: *R=Remember, U=Understand, A=Apply and above (Revised Bloom's taxonomy)*
Note*: This specification table provides general guidelines to assist students for their learning and to teachers to teach and question paper designers/setters to formulate test items/questions to assess the attainment of the UOs. The actual distribution of marks at different taxonomy levels (of R, U and A) in the question paper may slightly vary from above table.*

9. SUGGESTED STUDENT ACTIVITIES

Other than the classroom learning, following are the suggested student-related ***co-curricular*** activities which can be undertaken to accelerate the attainment of the various outcomes in this course. Students should make a portfolio i.e. perform at least FIVE from following list of activities individually or in group (not more than 2). They should prepare reports of about 2-5 pages for each activity and collect/ record physical evidence for their portfolio which may be useful for their placement interviews:

i. Develop two products from household waste (attach photographs).
ii. Download product development and innovative films from internet.
iii. Prepare a collage for "Traits of successful entrepreneurs."/ "Motivation & Charms of Entrepreneurship"
iv. Invite entrepreneurs, industry officials, bankers for interaction. Interview at least four entrepreneurs or businessman and identify
v. Identify your hobbies and interests and convert them into business idea.
vi. Mock Business Model- Choose a product and design a unique selling preposition, brand name, logo, advertisement (print, radio, and television), jingle, packaging, and labeling for it.
vii. Develop your own website. Share your strengths and weakness on it. Declare your time bound goals and monitor them on the website.
viii. Choose any product/ advertisement and analyze its good and bad points/ cost sheet/ supply chain etc. (individuals should select different ads)
ix. Compare schemes for entrepreneurship promotion of any bank.
x. Visit industrial exhibitions, trade fairs and observe nitty-gritty of business. Get news of Vibrant Gujarat Events. (Upcoming in Jan 2024)
xi. Open a savings account and build your own capital.
xii. Arrange a visit to a Mall, observe products, supply chain management and prepare report.
xiii. Organize industrial visit and suggest modifications for process improvement. Conduct a market survey for a product /project before visit. In the visit collect data on machinery specifications, price, output/hour, power consumption, manpower requirement, wages, raw material requirement, specification, price, competitor's product price, features, dealer commissions, marketing mix etc. Make a detailed report at the end of the visit.
xiv. Select a social cause, set objectives, plan and work for its accomplishment. Find details about some famous NGOs
xv. Present Own Dream Start-up story as Seminar OR Analyze 2 products from Shark Tank program.

10. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:

a) Massive open online courses (***MOOCs***) may be used to teach various topics/subtopics.
b) Guide student(s) in undertaking micro-projects.
c) ***'L' in section No. 4 means*** different types of teaching methods that is to be employed by teachers to develop the outcomes.
d) Show animation/ video related to course content.
e) Various Apps related to subject topics/ sub-topics
f) Other Common instructions as under
    1) Instructors should emphasize more on exemplary and deductive learning.
    2) Students should learn to recognize, create, shape opportunities, and lead teams forproviding economic-social value to society.
    3) Business simulations should be used to enhance behavioral traits of successfulintrapreneurs and entrepreneurs amongst students.
    4) Emphasis should be on creating entrepreneurial society rather than only setting upof enterprise.
    5) They must be encouraged to surf on net and collect as much information aspossible.
    6) Each student should complete minimum ten activities from the suggested list.Minimum possible guidance should be given for the suggested activities.
    7) Students should be promoted to use creative ideas, pool their own resources, finishtheir presentation, communication and team skills.
    8) Alumni should be frequently invited for experience sharing, guiding andrewarding students.
    9) Display must be arranged for models, collages, business plans and othercontributions so that they motivate others.
    10) You may show video/animation film / presentation slides to demonstrate variousmanagement functions, traits of entrepreneur etc.
    11) Arrange a visit to nearby venture capital firm.
    12) Give 1 Mini project and 1project report for future business to all the students.
    13) The following pedagogical tools will be used to teach this course:
        a) Lectures and Discussions
        b) Role Playing
        c) Assignments and Presentations
        d) Case Analysis
        e) Quiz on Management and Entrepreneurship
        g) Mimic/ narrate examples from world's leading businessmen among the students.
        h) Guide students on how to address issues on environment and sustainability

12. SUGGESTED MICRO-PROJECTS

Only one micro-project is planned to be undertaken by a student that needs to be assigned to him/her in the beginning of the semester. In the first four semesters, the micro-projects are group-based (group of 3 to 5). However, **in the fifth and sixth semesters**, the number of students in the group should ***not exceed three.***

The micro-project could be industry application based, internet-based, workshop-based, laboratory-based or field-based. Each micro-project should encompass two or more COs which are in fact, an integration of PrOs, UOs and ADOs. Each student will have to maintain a dated work diary consisting of individual contributions in the project work and give a seminar presentation of it before submission. The duration of the guidance for micro project should be about **6-8** ***(six to eight) student engagement hours*** during the theory/ course. The students ought to submit micro-project by the end of the semester to develop the industry-oriented COs.

A suggestive list of micro-projects/ practical exercise is given here. This has to match the competency and the COs. Similar micro-projects could be added by the concerned course teacher:
(It can be a Seminar with bound /hand written notes/ ppts of individual students OR a product/ service portfolio)

1) Entrepreneur Traits and Behavior Modelling
2) Various State and Central Entrepreneurship Promotional Schemes and Start-up Policies
3) Business Model for a Startup and study of Unicorns
4) Make your own Product / Service portfolio/ Proposal with USP, logo, advertisement (print, radio, and television), jingle,packaging, labeling and branding for it.

13. SUGGESTED LEARNING RESOURCES
