Chemical Engineering Project 2 (4360505) Presentation Review-1

Review 1 of Chemical Engineering Project 2 (4360505) was organized on 27/03/2024 from 10.30 am onwards. This report summarizes the presentations delivered by 27 final-year Chemical Engineering students on Project 2 using PPT. The presentations focused on key aspects of chemical plant design and operation, covering the following areas:

1. Material Balance
2. Plant Location and Layout
3. Cost Estimation
4. Utilities

The presentations for Project 2 effectively demonstrated the students' ability to apply their knowledge to design and analyze chemical processes. This project served as a valuable learning experience, preparing them for future careers in the chemical engineering industry.
